

Volume 10

CRM MONOGRAPH SERIES

Centre de Recherches Mathématiques
Université de Montréal

A Survey of the Hodge Conjecture Second Edition

James D. Lewis

with an appendix by
B. Brent Gordon

The Centre de Recherches Mathématiques (CRM) of the Université de Montréal was created in 1968 to promote research in pure and applied mathematics and related disciplines. Among its activities are special theme years, summer schools, workshops, postdoctoral programs, and publishing. The CRM is supported by the Université de Montréal, the Province of Québec (FCAR), and the Natural Sciences and Engineering Research Council of Canada. It is affiliated with the Institut des Sciences Mathématiques (ISM) of Montréal, whose constituent members are Concordia University, McGill University, the Université de Montréal, the Université du Québec à Montréal, and the Ecole Polytechnique.

American Mathematical Society
Providence, Rhode Island USA

Contents

Preface to the First Edition	ix
Preface to the Second Edition	xi
A Brief Description of the Contents in these Lectures	xiii
Lecture 1. Complex Manifolds	1
Lecture 2. Vector Bundles	17
Lecture 3. Kähler Manifolds	29
Lecture 4. Line Bundles	41
Lecture 5. The Lefschetz $(1, 1)$ Theorem	57
Lecture 6. The Lefschetz $(1, 1)$ Theorem Revisited	71
Lecture 7. Formulation of the General Hodge Conjecture	85
Lecture 8. Chern Class Theory	103
Lecture 9. Cohomology of Complete Intersections	119
Lecture 10. The Hodge Theorem	139
Lecture 11. Analytic and Topological Necessities of the Kähler Condition	159
Lecture 12. Intermediate Jacobians	171
Lecture 13. Various Approaches to the Hodge Conjecture for Varieties With Well Understood Geometric Structure	197
Lecture 14. The Approach to the Hodge Conjecture via Normal Functions	227
Lecture 15. Hodge Theory and Chow Groups	247
Appendix A. Results and Formulations in the Singular Case	283
Appendix B. A Survey of the Hodge Conjecture for Abelian Varieties	297
Index	357
Index of Notation	365
