Robert S. Liptser Albert N. Shiryaev

Statistics of Random Processes

II. Applications

Translated by A. B. Aries
Translation Editor: Stephen S. Wilson

Second, Revised and Expanded Edition

Springer

Table of Contents

Preface to the Second Edition V

11. Conditionally Gaussian Processes 1
11.1 Assumptions and Formulation of the Theorem of Conditional Gaussian Behavior 1
11.2 Auxiliary Lemmas 3
11.3 Proof of the Theorem of Conditional Gaussian Behavior 9

12. Optimal Nonlinear Filtering: Interpolation and Extrapolation of Components of Conditionally Gaussian Processes . 17
12.1 Optimal Filtering Equations 17
12.2 Uniqueness of Solutions of Filtering Equations: Equivalence of σ-Algebras F_t^{ξ} and $F_t^{\xi_0,\overline{W}}$ 25
12.3 Optimal Filtering Equations in Several Dimensions 32
12.4 Interpolation of Conditionally Gaussian Processes 38
12.5 Optimal Extrapolation Equations 49

13. Conditionally Gaussian Sequences: Filtering and Related Problems 55
13.1 Theorem on Normal Correlation 55
13.2 Recursive Filtering Equations for Conditionally Gaussian Sequences 67
13.3 Forward and Backward Interpolation Equations 77
13.4 Recursive Equations of Optimal Extrapolation 88
13.5 Examples 91

14. Application of Filtering Equations to Problems of Statistics of Random Sequences 99
14.1 Optimal Linear Filtering of Stationary Sequences with Rational Spectra 99
14.2 Maximum Likelihood Estimates for Coefficients of Linear Regression 107
14.3 A Control Problem with Incomplete Data (Linear System with Quadratic Performance Index) 113

14.4 Asymptotic Properties of the Optimal Linear Filter 121
14.5 Recursive Computation of the Best Approximate Solutions (Pseudo-solutions) of Linear Algebraic Systems 132
14.6 Kalman Filter under Wrong Initial Conditions 138

15. Linear Estimation of Random Processes 145
15.1 Wide-Sense Wiener Processes 145
15.2 Optimal Linear Filtering for some Classes of Nonstationary Processes 157
15.3 Linear Estimation of Wide-Sense Stationary Random Processes with Rational Spectra 161
15.4 Comparison of Optimal Linear and Nonlinear Estimates 170

16. Application of Optimal Nonlinear Filtering Equations to some Problems in Control Theory and Estimation Theory 177
16.1 An Optimal Control Problem Using Incomplete Data 177
16.2 Asymptotic Properties of Kalman–Bucy Filters 184
16.3 Computation of Mutual Information and Channel Capacity of a Gaussian Channel with Feedback 190
16.4 Optimal Coding and Decoding for Transmission of a Gaussian Signal Through a Channel with Noiseless Feedback 195
16.5 Asymptotic Properties of the Linear Filter under Wrong Initial Conditions 214

17. Parameter Estimation and Testing of Statistical Hypotheses for Diffusion-Type Processes 219
17.1 Maximum Likelihood Method for Coefficients of Linear Regression 219
17.2 Parameter Estimation of the Drift Coefficient for Diffusion-Type Processes 225
17.3 Parameter Estimation of the Drift Coefficient for a One-Dimensional Gaussian Process 230
17.4 Two-Dimensional Gaussian Markov Processes: Parameter Estimation 236
17.5 Sequential Maximum Likelihood Estimates 244
17.6 Sequential Testing of Two Simple Hypotheses for Itô Processes 248
17.7 Some Applications to Stochastic Approximation 256

18. Random Point Processes: Stieltjes Stochastic Integrals 261
18.1 Point Processes and their Compensators 261
18.2 Minimal Representation of a Point Process: Processes of the Poisson Type 269
18.3 Construction of Point Processes with Given Compensators: Theorems on Existence and Uniqueness 277

18.4 Stieltjes Stochastic Integrals 286
18.5 The Structure of Point Processes with Deterministic and Continuous Compensators 305

19. The Structure of Local Martingales, Absolute Continuity of Measures for Point Processes, and Filtering 309
19.1 The Structure of Local Martingales 309
19.2 Nonnegative Supermartingale: Analog of Girsanov's Theorem 315
19.3 Optimal Filtering from the Observations of Point Processes .. 325
19.4 The Necessary and Sufficient Conditions for Absolute Continuity of the Measures Corresponding to Point Processes 336
19.5 Calculation of the Mutual Information and the Cramer–Rao–Wolfowitz Inequality (the Point Observations) 345

20. Asymptotically Optimal Filtering 355
20.1 Total Variation Norm Convergence and Filtering 355
20.2 Robust Diffusion Approximation for Filtering 371
