|--|-----------|
| <b>I Sets, Numbers, and Graphs</b>                           | <b>1</b>  |
| <b>1 Fundamentals—Concepts and Logic</b>                     | <b>3</b>  |
| 1.1 Propositional Logic .....                                | 4         |
| 1.2 Architecture of Concepts .....                           | 6         |
| <b>2 Axiomatic Set Theory</b>                                | <b>13</b> |
| 2.1 The Axioms .....   | 14        |
| 2.2 Basic Concepts and Results .....                         | 17        |
| <b>3 Boolean Set Algebra</b>                                 | <b>19</b> |
| 3.1 The Boolean Algebra of Subsets.....                      | 19        |
| <b>4 Functions and Relations</b>                             | <b>23</b> |
| 4.1 Graphs and Functions .....                               | 23        |
| 4.2 Relations .....  | 35        |
| <b>5 Ordinal and Natural Numbers</b>                         | <b>39</b> |
| 5.1 Ordinal Numbers .....                                    | 39        |
| 5.2 Natural Numbers .....                                    | 44        |
| <b>6 Recursion Theorem and Universal Properties</b>          | <b>49</b> |
| 6.1 Recursion Theorem.....                                   | 50        |
| 6.2 Universal Properties .....                               | 51        |
| 6.3 Universal Properties in Relational Database Theory ..... | 59        |
| <b>7 Natural Arithmetic</b>                                  | <b>65</b> |
| 7.1 Natural Operations .....                                 | 65        |
| 7.2 Euclid and the Normal Forms .....                        | 67        |
| <b>8 Infinities</b>  | <b>71</b> |
| 8.1 The Diagonalization Procedure .....                      | 71        |

---

|  |            |
|--|------------|
| <b>9 The Classical Number Domains <math>\mathbb{Z}</math>, <math>\mathbb{Q}</math>, <math>\mathbb{R}</math>, and <math>\mathbb{C}</math></b> | <b>73</b>  |
| 9.1 Integers $\mathbb{Z}$ .....  | 74         |
| 9.2 Rationals $\mathbb{Q}$ .....   | 79         |
| 9.3 Real Numbers $\mathbb{R}$ .....  | 82         |
| 9.4 Complex Numbers $\mathbb{C}$ .....   | 93         |
| <b>10 Categories of Graphs</b>   | <b>97</b>  |
| 10.1 Directed and Undirected Graphs .....  | 98         |
| 10.2 Morphisms of Digraphs and Graphs .....  | 103        |
| 10.3 Cycles .....  | 113        |
| <b>11 Construction of Graphs</b>   | <b>117</b> |
| <b>12 Some Special Graphs</b>  | <b>121</b> |
| 12.1 $n$ -ary Trees .....  | 121        |
| 12.2 Moore Graphs .....  | 122        |
| <b>13 Planarity</b>  | <b>125</b> |
| 13.1 Euler's Formula for Polyhedra .....   | 125        |
| 13.2 Kuratowski's Planarity Theorem .....  | 129        |
| <b>14 First Advanced Topic</b>   | <b>131</b> |
| 14.1 Floating Point Arithmetic .....   | 131        |
| 14.2 Example for an Addition .....   | 136        |
| <b>II Algebra, Formal Logic, and Linear Geometry</b>   | <b>139</b> |
| <b>15 Monoids, Groups, Rings, and Fields</b>   | <b>141</b> |
| 15.1 Monoids .....   | 141        |
| 15.2 Groups .....  | 144        |
| 15.3 Rings .....   | 152        |
| 15.4 Fields .....  | 158        |
| <b>16 Primes</b>   | <b>161</b> |
| 16.1 Prime Factorization .....   | 161        |
| 16.2 Roots of Polynomials and Interpolation .....  | 165        |
| <b>17 Formal Propositional Logic</b>   | <b>169</b> |
| 17.1 Syntactics: The Language of Formal Propositional Logic ..   | 171        |
| 17.2 Semantics: Logical Algebras .....   | 174        |
| 17.3 Signification: Valuations .....   | 178        |
| 17.4 Axiomatics .....  | 180        |

|   |            |
|---|------------|
| <b>18 Formal Predicate Logic</b>                                | <b>185</b> |
| 18.1 Syntactics: First-order Language .....                     | 187        |
| 18.2 Semantics: $\Sigma$ -Structures .....                      | 192        |
| 18.3 Signification: Models .....                                | 194        |
| <b>19 Languages, Grammars, and Automata</b>                     | <b>199</b> |
| 19.1 Languages .....  | 200        |
| 19.2 Grammars .....   | 205        |
| 19.3 Automata and Acceptors .....                               | 219        |
| <b>20 Categories of Matrixes</b>                                | <b>237</b> |
| 20.1 What Matrixes Are .....                                    | 238        |
| 20.2 Standard Operations on Matrixes .....                      | 241        |
| 20.3 Square Matrixes and their Determinant .....                | 246        |
| <b>21 Modules and Vector Spaces</b>                             | <b>255</b> |
| <b>22 Linear Dependence, Bases, and Dimension</b>               | <b>263</b> |
| 22.1 Bases in Vector Spaces .....                               | 264        |
| 22.2 Equations .....  | 270        |
| 22.3 Affine Homomorphisms .....                                 | 271        |
| <b>23 Algorithms in Linear Algebra</b>                          | <b>279</b> |
| 23.1 Gauss Elimination .....                                    | 279        |
| 23.2 The LUP Decomposition .....                                | 283        |
| <b>24 Linear Geometry</b>                                       | <b>287</b> |
| 24.1 Euclidean Vector Spaces .....                              | 287        |
| 24.2 Trigonometric Functions from Two-Dimensional Rotations     | 296        |
| 24.3 Gram's Determinant and the Schwarz Inequality .....        | 299        |
| <b>25 Eigenvalues, the Vector Product, and Quaternions</b>      | <b>303</b> |
| 25.1 Eigenvalues and Rotations .....                            | 303        |
| 25.2 The Vector Product .....                                   | 306        |
| 25.3 Quaternions .....  | 309        |
| <b>26 Second Advanced Topic</b>                                 | <b>319</b> |
| 26.1 Galois Fields .....  | 319        |
| 26.2 The Reed-Solomon (RS) Error Correction Code .....          | 324        |
| 26.3 The Rivest-Shamir-Adelman (RSA) Encryption Algorithm ..... | 327        |
| <b>A Further Reading</b>  | <b>331</b> |
