Preface	ix
Chapter 1. Fourier expansion of hyperfunctions on the circle	1
1.1. Function spaces on the circle	1
1.2. Fourier series	3
1.3. Distributions and hyperfunctions	7
1.4. Fourier expansion of distributions	7
1.5. Fourier expansion of hyperfunctions	9
1.6. Poisson integral of a hyperfunction	11
1.7. Fourier-Borel transform of a hyperfunction	12
1.8. Cauchy-Hilbert transform of a hyperfunction	12
Chapter 2. Spherical harmonic expansion of functions on the sphere	15
2.1. Definition of spherical harmonics	15
2.2. Laplacian on the sphere	19
2.3. Reproducing kernel and addition theorem	24
2.4. Legendre polynomials	30
2.5. Hecke-Funk formula	32
2.6. $L^2(\mathbb{S})$ and $\mathcal{E}(\mathbb{S})$	35
2.7. Distributions on the sphere	37
2.8. Generating formula of Legendre polynomials	39
2.9. Poisson integral	43
Chapter 3. Harmonic functions on the Lie ball	47
3.1. Polynomial mappings	47
3.2. Cross norm and Lie norm	51
3.3. Lie ball	58
3.4. Holomorphic functions on the Lie ball	61
3.5. Complex harmonic functions on the Lie ball	64
3.6. Poisson integral on \mathbb{S}_r	67
3.7. Harmonic functions on the real ball	68
Chapter 4. Holomorphic functions on the complex sphere	71
4.1. The complex sphere	71
4.2. Spherical harmonics on $\tilde{\mathbb{S}}_\lambda$	73
4.3. Poisson integral on $\tilde{\mathbb{S}}_{\lambda,r}$	79
4.4. Harmonic functionals on the Lie ball	81

4.5.	Hardy spaces of harmonic functions	84
4.6.	Double series expansion of holomorphic functions on the Lie ball	85
4.7.	Holomorphic functions on the complex sphere	86
4.8.	Symbolic integral form on $\tilde{S}_{\lambda,r}$	89
4.9.	Analytic functionals on the complex sphere	90
4.10.	Hardy spaces on the complex sphere	93
4.11.	Dirichlet problem and hyperfunctions	94
Chapter 5.	Holomorphic functions on the Lie ball	97
5.1.	Gegenbauer polynomials	97
5.2.	Cauchy-Hua integral formula	100
5.3.	Analytic functionals on the Lie ball	102
5.4.	Eigenfunctions of the complex Laplacian	103
5.5.	γ -harmonic functionals on the Lie ball	109
5.6.	Hardy space of γ -harmonic functions	112
5.7.	γ -Poisson-Hua kernel	113
Chapter 6.	Entire functions of exponential type	117
6.1.	Entire functions on \tilde{E}	117
6.2.	Dual Lie norm	120
6.3.	λ -harmonic entire functions	121
6.4.	Entire functions of exponential type on \tilde{S}_γ	123
Chapter 7.	Fourier-Borel transformation on the complex sphere	127
7.1.	Fourier-Borel transforms of analytic functionals on \tilde{S}_λ	127
7.2.	Entire λ -harmonic functionals	129
7.3.	Spherical Fourier-Borel transforms of λ -harmonic entire functionals	130
7.4.	F-Cauchy transformation	131
7.5.	Hilbert spaces of λ -harmonic entire functions	134
Chapter 8.	Spherical Fourier-Borel transformation on the Lie ball	139
8.1.	Spherical Fourier-Borel transforms of γ -harmonic functionals	139
8.2.	Entire functionals on \tilde{S}_γ	141
8.3.	Fourier-Borel transforms of entire functionals on \tilde{S}_γ	143
8.4.	F- γ -Poisson transformation	144
8.5.	Hilbert spaces of entire functions on the complex sphere	148
8.6.	F- γ -Poisson-Hua transformation	151
