

Contents

Introduction	1
§1. Physical problems leading to nonlinear nonlocal equations	1
§2. Brief review of the content of this book	6
CHAPTER 1. Simplest Properties of Solutions of Nonlinear Nonlocal Equations	11
§1. Conservation laws. Solitary waves	11
§2. Wave peaking	14
§3. Breaking of waves in the case of a monotone kernel	18
CHAPTER 2. The Cauchy Problem for the Whitham Equation	29
§1. Introduction	29
§2. The existence of a classical solution for the Cauchy problem on a finite time-interval	31
§3. The existence of a global in time solution	40
§4. Smoothing of solutions	43
§5. Breaking of waves for a conservative or dissipative operator of order less than $3/5$	47
§6. Breaking of waves for arbitrary operators of order less than $2/3$	51
§7. Proof of Theorem 10	60
CHAPTER 3. The Periodic Problem	65
§1. Introduction	65
§2. Breaking of waves for a conservative or dissipative operator \mathbb{K} of order $\alpha < 3/5$	65
§3. On the existence of a global solution of the Cauchy problem	74
§4. Smoothing of solutions of the Cauchy problem	76
§5. The periodic problem with a weak interaction	84
CHAPTER 4. The System of Equations of Surface Waves	89
§1. Conservation laws	89
§2. The Cauchy problem for the system of equations of surface waves with a regular operator	91
§3. The Cauchy problem for the system of equations of surface waves with a dissipative or conservative operator	97
§4. Breaking of waves	101

§5. Existence of a global solution of the Cauchy problem	125
§6. Smoothing of the initial perturbations	126
§7. Smoothing of initial perturbations from L_2	133
§8. The Cauchy problem for the system of equations for surface waves with weak nonlocal interaction	138
CHAPTER 5. Generalized Solutions	141
§1. Introduction	141
§2. The dissipative Whitham equation	143
§3. The conservative Whitham equation	145
§4. The shallow water equation	147
§5. Nonlinear nonlocal Schrödinger equation	150
§6. The system of surface waves	153
CHAPTER 6. The Asymptotics as $t \rightarrow \infty$ of Solutions of the Generalized Kolmogorov-Petrovskii-Piskunov Equation	159
§1. Introduction	159
§2. Proof of the theorem	160
§3. Computation of the functions $\Phi_{\mathcal{N}}(p)$	164
CHAPTER 7. Asymptotics of Solutions of the Whitham Equation for Large Times	179
§1. Introduction	179
§2. Technical lemmas	180
§3. Proof of the theorem	183
§4. Computation of the numbers $\Phi_{\mathcal{N}}$	190
§5. Asymptotics of solutions of the KDV equation	194
CHAPTER 8. Asymptotics as $t \rightarrow \infty$ of Solutions of the Nonlinear Nonlocal Schrödinger Equation	209
§1. Introduction	209
§2. Technical lemmas	210
§3. Proof of Theorem 1	212
§4. Computation of the numbers $\Phi_{\mathcal{N}}$	217
§5. Computation of the asymptotics for the Landau-Ginzburg equation	227
§6. Asymptotics of solutions for periodic problem of the nonlinear Schrödinger equation for large times	229
CHAPTER 9. Asymptotics of Solutions for a System of Equations of Surface Waves for Large Times	235
§1. Introduction	235
§2. Lemmas	238
§3. Proof of the theorem	239
§4. Computation of the vectors $\Phi_{\mathcal{N}}$	252
CHAPTER 10. The Step-Decaying Problem for the Korteweg-de Vries-Burgers Equation	261
§1. Introduction	261
§2. First theorem	262

§3. Second theorem	267
§4. A lemma	271
§5. The step-decaying problem for the Kuramoto-Sivashinsky equation	276
References	281
Supplementary References	288
