Contents

Introduction	xiii
Chapter 1. Preliminaries	1
§1.1. Bundles, connections and characteristic classes	1
1.1.1. Vector bundles and connections	1
1.1.2. Chern-Weil theory	12
§1.2. Basic facts about elliptic equations	16
§1.3. Clifford algebras and Dirac operators	27
1.3.1. Clifford algebras and their representations	27
1.3.2. The $Spin$ and $Spin^c$ groups	34
1.3.3. $Spin$ and $spin^c$ structures	40
1.3.4. Dirac operators associated to $spin$ and $spin^c$ structures	46
§1.4. Complex differential geometry	53
1.4.1. Elementary complex differential geometry	54
1.4.2. Cauchy-Riemann operators	68
1.4.3. Dirac operators on almost Kähler manifolds	80
§1.5. Fredholm theory	85
1.5.1. Continuous families of elliptic operators	85
1.5.2. Genericity results	100
Chapter 2. The Seiberg-Witten Invariants	103
§2.1. Seiberg-Witten monopoles	103

2.1.1.	The Seiberg-Witten equations	103
2.1.2.	The functional set-up	108
§2.2.	The structure of the Seiberg-Witten moduli spaces	114
2.2.1.	The topology of the moduli spaces	114
2.2.2.	The local structure of the moduli spaces	119
2.2.3.	Generic smoothness	131
2.2.4.	Orientability	137
§2.3.	The structure of the Seiberg-Witten invariants	139
2.3.1.	The universal line bundle	139
2.3.2.	The case $b_2^+ > 1$	142
2.3.3.	The case $b_2^+ = 1$	154
2.3.4.	Some examples	169
§2.4.	Applications	176
2.4.1.	The Seiberg-Witten equations on cylinders	176
2.4.2.	The Thom conjecture	183
2.4.3.	Negative definite smooth 4-manifolds	188
Chapter 3.	Seiberg-Witten Equations on Complex Surfaces	195
§3.1.	A short trip in complex geometry	195
3.1.1.	Basic notions	195
3.1.2.	Examples of complex surfaces	213
3.1.3.	Kodaira classification of complex surfaces	225
§3.2.	Seiberg-Witten invariants of Kähler surfaces	228
3.2.1.	Seiberg-Witten equations on Kähler surfaces	228
3.2.2.	Monopoles, vortices and divisors	233
3.2.3.	Deformation theory	242
§3.3.	Applications	245
3.3.1.	A nonvanishing result	246
3.3.2.	Seiberg-Witten invariants of simply connected elliptic surfaces	252
3.3.3.	The failure of the h -cobordism theorem in four dimensions	274
3.3.4.	Seiberg-Witten equations on symplectic 4-manifolds	275
Chapter 4.	Gluing Techniques	283

§4.1. Elliptic equations on manifolds with cylindrical ends	283
4.1.1. Manifolds with cylindrical ends	283
4.1.2. The Atiyah-Patodi-Singer index theorem	286
4.1.3. Eta invariants and spectral flows	292
4.1.4. The Lockhart-McOwen theory	298
4.1.5. Abstract linear gluing results	303
4.1.6. Examples	309
§4.2. Finite energy monopoles	328
4.2.1. Regularity	328
4.2.2. Three-dimensional monopoles	330
4.2.3. Asymptotic behavior. Part I	338
4.2.4. Asymptotic behavior. Part II	344
4.2.5. Proofs of some technical results	359
§4.3. Moduli spaces of finite energy monopoles: Local aspects	368
4.3.1. Functional set-up	368
4.3.2. The Kuranishi picture	383
4.3.3. Virtual dimensions	397
4.3.4. Reducible finite energy monopoles	404
§4.4. Moduli spaces of finite energy monopoles: Global aspects	409
4.4.1. Genericity results	409
4.4.2. Compactness properties	412
4.4.3. Orientability issues	425
§4.5. Cutting and pasting of monopoles	428
4.5.1. Some basic gluing constructions	429
4.5.2. Gluing monopoles: Local theory	435
4.5.3. The local surjectivity of the gluing construction	447
4.5.4. Gluing monopoles: Global theory	451
§4.6. Applications	460
4.6.1. Vanishing results	461
4.6.2. Blow-up formula	465
Epilogue	471
Bibliography	473
Index	481
