Liviu I. Nicolaescu

The Reidemeister Torsion of 3-Manifolds

Walter de Gruyter
Berlin · New York 2003

Contents

Introduction vii

Notations and conventions xi

1 Algebraic preliminaries 1
§1.1 The torsion of acyclic complexes of vector spaces 1
§1.2 The determinant line of a chain complex 7
§1.3 Basic properties of the torsion 16
§1.4 Some generalizations 20
§1.5 Abelian group algebras 21
§1.6 Abelian harmonic analysis 30

2 The Reidemeister torsion 44
§2.1 The Reidemeister torsion of a CW-complex 44
§2.2 Fitting ideals 59
§2.3 The Alexander function and the Reidemeister torsion 63
§2.4 The Reidemeister torsion of 3-manifolds 67
§2.5 Computing the torsion of 3-manifolds using surgery presentations . . 70
§2.6 Plumbings 83
§2.7 Applications 102

3 Turaev's refined torsion 106
§3.1 Combinatorial Euler structures 106
§3.2 Smooth Euler structures 108
§3.3 U(2) and Spin^c(3) 115
§3.4 Euler structures on 3-manifolds 120
§3.5 The Reidemeister–Turaev torsion of Euler structures 126
§3.6 Arithmetic properties of the Reidemeister–Turaev torsion of 3-manifolds 127
§3.7 Axiomatic description of the Reidemeister–Turaev torsion of 3-manifolds 131
§3.8 The torsion of rational homology 3-spheres. Part 1. 135
§3.9 Quadratic functions, spin^c structures and charges 148
§3.10 The torsion of rational homology 3-spheres. Part 2. 164

4 Alternative interpretations of the Reidemeister torsion 174
§4.1 A gauge theoretic interpretation: Seiberg–Witten invariants 174
§4.2 A Morse theoretic interpretation 187
§4.3 A spectral interpretation: the Ray–Singer analytic torsion 193

A Algebra 197
§A.1 Formal Hodge theory 197
§A.2 Determinants and zeta functions 202
§A.3 Extensions of Abelian groups 205

B Topology 210
§B.1 How to compute the Alexander polynomial of a knot 210
§B.2 Dehn surgery and linking forms 216
