Library of Congress Cataloging-in-Publication Data

Greenspan, Donald.

Particle modeling / Donald Greenspan.

p. cm. -- (Modeling and simulation in science, engineering & technology)

Includes bibliographical references and index.

ISBN 0-8176-3985-3 (hardcover : alk. paper). -- ISBN 3-7643-3985-3

1. Science--Computer simulation. 2. Technology--Computer simulation. 3. Differential equations--Numerical solutions.

4. Initial value problems--Numerical solutions. I. Title.

II. Series.

CONTENTS

Preface	xi
----------------------	-----------

Part I. Mathematical, Physical and Numerical Considerations	1
--	----------

Chapter 1. Particle Modeling: What It Is and What It Is Not	3
1.1 Introduction	3
1.2 Classical Molecular Forces	3
1.3 General Modeling Principles	5

Chapter 2. Numerical Methodology	7
2.1 Introduction	7
2.2 The Leap Frog Method	7
2.3 Completely Conservative Numerical Methodology	11
2.4 Remarks	19

Part II. Qualitative Newtonian Modeling	23
--	-----------

Chapter 3. Elastic Strings and Solitons	25
3.1 Introduction	25
3.2 Discrete Strings	25
3.3 Example	27
3.4 String Solitons	28

3.5 Heavy Strings and Strings with One Fixed End	31
3.6 Remark	31
Chapter 4. Elastic Snap Through	35
4.1 Introduction	35
4.2 An Arch	35
4.3 Elastic Snap Through	36
4.4 Unstable Mode Approximation	38
4.5 Remarks	41
Chapter 5. Minimal Surfaces	43
5.1 Introduction	43
5.2 Computer Examples	44
Chapter 6. Biological Self Reorganization	57
6.1 Introduction	57
6.2 Computer Examples	58
6.3 Remarks	64
Chapter 7. Cavity Flow	71
7.1 Introduction	71
7.2 Computer Example	71
7.3 Additional Examples	78
Chapter 8. Turbulent and Nonturbulent Vortices	83
8.1 Introduction	83
8.2 Basic Definitions	84
8.3 Examples	87
8.4 Remark	93

Chapter 9. Liquid Drop Formation, Fall, and Collision	95
9.1 Introduction	95
9.2 Drop Generation	95
9.3 Drop Fall	96
9.4 Drop Collision	99
 Chapter 10. Conservative Motion of Tops and Gyroscopes	 105
10.1 Introduction	105
10.2 A Discrete, Rigid Tetrahedral Top	105
10.3 Dynamical Equations	107
10.4 Numerical Method	109
10.5 Examples	111
10.6 Extensions	122
10.7 A Discrete, Rigid Hexahedral Gyroscope	123
10.8 Dynamical Equations	125
10.9 Numerical Method	127
10.10 Examples	132
10.11 Remark	138
 Part III. Quantitative Modeling	 141
 Chapter 11. Stress Wave Propagation in Slender Bars	 143
11.1 Introduction	143
11.2 Force Formula Development	143
11.3 Particle Model of a Slender Bar	145
11.4 Examples	146
 Chapter 12. Colliding Microdrops of Water	 151
12.1 Introduction	151

12.2 Mathematical and Physical Considerations	151
12.3 Examples	153
Chapter 13. Crack Development in a Stressed Copper Plate	161
13.1 Introduction	161
13.2 Formular Derivation	161
13.3 Examples	164
Chapter 14. Liquid Drop Formation on a Solid Surface	171
14.1 Introduction	171
14.2 Local Force Formulas	171
14.3 Dynamical Equations	176
14.4 Drop and Slab Stabilization	178
14.5 Sessile Drop Formation	179
Chapter 15. Fluid Bubbles and Jiggling Gels	183
15.1 Introduction	183
15.2 Fluid Models	183
15.3 Basin Stabilization	188
15.4 Motion of CO ₂ Bubbles	189
15.5 Jiggling Gels	193
Chapter 16. Melting Points	205
16.1 Introduction	205
16.2 Formula Development	205
16.3 Noble Gas Calculations	208
16.4 Helium (26atm)	210
16.5 Homogeneous, Diatomic Molecular Solids	212

Chapter 17. Special Relativistic Motion	215
17.1 Introduction	215
17.2 Inertial Frames	215
17.3 The Lorentz Transformation	216
17.4 Rod Contraction and Time Dilation	216
17.5 Relativistic Particle Motion	218
17.6 Covariance	219
17.7 Relativistic Motion	220
17.8 Numerical Methodology	221
17.9 Relativistic Harmonic Oscillation	224
17.10 Computational Covariance	224
 Chapter 18. A Speculative Model	
 of the Diatomic Molecular Bond	231
18.1 Introduction	231
18.2 Classical Simulation	
of the Hydrogen Molecule	231
18.3 Modification of the Classical Model	234
18.4 Extension to Li_2 , B_2 , C_2 , N_2 and O_2	235
 References and Sources for Further Reading	237
 Appendices — FORTRAN Programs	
 and Related Formulas	251
A1. STRESS. FOR.	251
A2. DROP. FOR	253
A3. MORSE. FOR	257
A4. GHEXA. FOR	259
A5. NEWTONIAN ITERATION FORMULAS	269
 Index	271
