| | |
|---|---|
| Preface | p. vii |
| Acknowledgements | p. ix |
| Notation | p. xi |
| List of Abbreviations | p. xv |
| Introduction and Preliminaries | p. 1 |
| Historical Background of Interior-Point Methods | p. 2 |
| Prelude | p. 2 |
| A Brief Review of Modern Interior-Point Methods | p. 3 |
| Primal-Dual Path-Following Algorithm for LO | p. 5 |
| Primal-Dual Model for LO, Duality Theory and the Central Path | p. 5 |
| Primal-Dual Newton Method for LO | p. 8 |
| Strategies in Path-following Algorithms and Motivation | p. 12 |
| Preliminaries and Scope of the Monograph | p. 16 |
| Preliminary Technical Results | p. 16 |
| Relation Between Proximities and Search Directions | p. 20 |
| Contents and Notational Abbreviations | p. 22 |
| Self-Regular Functions and Their Properties | p. 27 |
| An Introduction to Univariate Self-Regular Functions | p. 28 |
| Basic Properties of Univariate Self-Regular Functions | p. 35 |
| Relations Between S-R and S-C Functions | p. 42 |
| Primal-Dual Algorithms for Linear Optimization Based on Self-Regular Proximities | p. 47 |
| Self-Regular Functions inR n + + and Self-Regular Proximities for LO | p. 48 |
| The Algorithm | p. 52 |
| Estimate of the Proximity After a Newton Step | p. 55 |
| Complexity of the Algorithm | p. 61 |
| Relaxing the Requirement on the Proximity Function | p. 63 |
| Interior-Point Methods for Complementarity Problems Based on Self-Regular Proximities | p. 67 |
| Introduction to CPs and the Central Path | p. 68 |
| Preliminary Results on P * (k) Mappings | p. 72 |
| New Search Directions for P * (k) CPs | p. 80 |
| Complexity of the Algorithm | p. 83 |
| Ingredients for Estimating the Proximity | p. 83 |
| Estimate of the Proximity After a Step | p. 87 |
| Complexity of the Algorithm for CPs | p. 96 |
| Primal-Dual Interior-Point Methods for Semidefinite Optimization Based on Self-Regular Proximities | p. 99 |
| Introduction to SDO, Duality Theory and Central Path | p. 100 |
| Preliminary Results on Matrix Functions | p. 103 |
| New Search Directions for SDO | p. 111 |
| Scaling Schemes for SDO | p. 111 |
| Intermezzo: A Variational Principle for Scaling | p. 112 |

New Proximities and Search Directions for SDO p. 114
New Polynomial Primal-Dual IPMs for SDO p. 117
The Algorithm p. 117
Complexity of the Algorithm p. 118
Primal-Dual Interior-Point Methods for Second-Order Conic Optimization Based on Self-Regular Proximities p. 125
Introduction to SOCO, Duality Theory and The Central Path p. 126
Preliminary Results on Functions Associated with Second-Order Cones p. 129
Jordan Algebra, Trace and Determinant p. 130
Functions and Derivatives Associated with Second-Order Cones p. 132
New Search Directions for SOCO p. 142
Preliminaries p. 142
Scaling Schemes for SOCO p. 143
Intermezzo: A Variational Principle for Scaling p. 145
New Proximities and Search Directions for SOCO p. 147
New IPMs for SOCO p. 150
The Algorithm p. 150
Complexity of the Algorithm p. 152
Initialization: Embedding Models for Linear Optimization, Complementarity Problems, Semidefinite Optimization and Second-Order Conic Optimization p. 159
The Self-Dual Embedding Model for LO p. 160
The Embedding Model for CP p. 162
Self-Dual Embedding Models for SDO and SOCO p. 165
Conclusions p. 169
A Survey of the Results and Future Research Topics p. 170
References p. 175
Index p. 183
