Contents

Preface	IX
Notation	XI
Introduction	1
0 Algebraic geometry	1
1 Some objects	1
2 Some problems	4
I Affine algebraic sets	9
1 Affine algebraic sets and the Zariski topology	9
2 Ideal of an affine algebraic set	11
3 Irreducibility	13
4 The Nullstellensatz (or Hilbert's zeros theorem)	15
5 A first step towards Bézout's theorem	19
6 An introduction to morphisms	20
Exercises	24
II Projective algebraic sets	25
0 Motivation	25
1 Projective space	25
2 Homographies	27
3 Relation between affine and projective space	27
4 Projective algebraic sets	29
5 Ideal of a projective algebraic set	31
6 A graded ring associated to a projective algebraic set	32
7 Appendix: graded rings	33
Exercises	34

III	Sheaves and varieties	37
0	Motivation	37
1	The sheaf concept	38
2	The structural sheaf of an affine algebraic set	41
3	Affine varieties	43
4	Algebraic varieties	44
5	Local rings	47
6	Sheaves of modules	48
7	Sheaves of modules on an affine algebraic variety	50
8	Projective varieties	52
9	Sheaves of modules on projective algebraic varieties	56
10	Two important exact sequences	59
11	Examples of morphisms	60
	Exercises A	63
	Exercises B	66
IV	Dimension	69
0	Introduction	69
1	The topological definition and the link with algebra	69
2	Dimension and counting equations	72
3	Morphisms and dimension	77
4	Annex: finite morphisms	82
	Exercises	83
V	Tangent spaces and singular points	87
0	Introduction	87
1	Tangent spaces	88
2	Singular points	91
3	Regular local rings	93
4	Curves	95
	Exercises	97
VI	Bézout's theorem	101
0	Introduction	101
1	Intersection multiplicities	101
2	Bézout's theorem	106
	Exercises	111
VII	Sheaf cohomology	113
0	Introduction	113
1	Some homological algebra	114
2	Čech cohomology	117
3	Vanishing theorems	121
4	The cohomology of the sheaves $\mathcal{O}_{\mathbf{P}^n}(d)$	122
	Exercises	127

VIII Arithmetic genus of curves and the weak Riemann-Roch theorem	131
0 Introduction: the Euler-Poincaré characteristic	131
1 Degree and genus of projective curves, Riemann-Roch 1	132
2 Divisors on a curve and Riemann-Roch 2	138
Exercises	147
IX Rational maps, geometric genus and rational curves	149
0 Introduction	149
1 Rational maps	149
2 Curves	152
3 Normalisation: the algebraic method	155
4 Affine blow-ups	158
5 Global blow-ups	163
6 Appendix: review of the above proofs	170
X Liaison of space curves	173
0 Introduction	173
1 Ideals and resolutions	174
2 ACM curves	179
3 Liaison of space curves	187
Exercises	194
Appendices	
A Summary of useful results from algebra	199
1 Rings	199
2 Tensor products	204
3 Transcendence bases	206
4 Some algebra exercises	207
B Schemes	209
0 Introduction	209
1 Affine schemes	210
2 Schemes	210
3 What changes when we work with schemes	211
4 Why working with schemes is useful	212
5 A scheme-theoretic Bertini theorem	213
C Problems	215
Problem I	215
Problem II	217
Problem III	218
Problem IV	220
Problem V	222

VIII Contents

Problem VI	223
Problem VII	225
Problem VIII	228
Problem IX	230
Midterm, December 1991	232
Exam, January 1992	234
Exam, June 1992	238
Exam, January 1993	239
Exam, June 1993	242
Exam, February 1994	245
References	251
Index of notations	253
Index	255
