Reed, Michael.

Methods of modern mathematical physics.

Includes bibliographical references.

CONTENTS: v. 1. Functional analysis.—v. 2. Fourier analysis, self-adjointness.—

1. Mathematical physics. 1. Simon, Barry, joint author. II. Title.

QC20.R37 1972 530.1'5 75-182650

ISBN 0-12-585002-6(v. 2)

AMS (MOS) 1970 Subject Classifications: 42-02, 47-02

PRINTED IN THE UNITED STATES OF AMERICA

Contents

<i>Preface</i>	vii
<i>Introduction</i>	ix
<i>Contents of Other Volumes</i>	xv

IX: THE FOURIER TRANSFORM

1. <i>The Fourier transform on $\mathcal{S}(\mathbb{R}^n)$ and $\mathcal{S}'(\mathbb{R}^n)$, convolutions</i>	1
2. <i>The range of the Fourier transform: Classical spaces</i>	9
3. <i>The range of the Fourier transform: Analyticity</i>	15
4. <i>L^p Estimates</i>	27
<i>Appendix Abstract interpolation</i>	32
5. <i>Fundamental solutions of partial differential equations with constant coefficients</i>	45
6. <i>Elliptic regularity</i>	49
7. <i>The free Hamiltonian for nonrelativistic quantum mechanics</i>	54
8. <i>The Gårding–Wightman axioms</i>	61
<i>Appendix Lorentz invariant measures</i>	72
9. <i>Restriction to submanifolds</i>	76
10. <i>Products of distributions, wave front sets, and oscillatory integrals</i>	87
<i>Notes</i>	108
<i>Problems</i>	120
<i>Reader's Guide</i>	133

X: SELF-ADJOINTNESS AND THE EXISTENCE OF DYNAMICS

1. <i>Extensions of symmetric operators</i>	135
<i>Appendix Motion on a half-line, limit point–limit circle methods</i>	146
2. <i>Perturbations of self-adjoint operators</i>	162
3. <i>Positivity and self-adjointness I: Quadratic forms</i>	176
4. <i>Positivity and self-adjointness II: Pointwise positivity</i>	182
5. <i>The commutator theorem</i>	191
6. <i>Analytic vectors</i>	200
7. <i>Free quantum fields</i>	207
<i>Appendix The Weyl relations for the free field</i>	231
8. <i>Semigroups and their generators</i>	235
9. <i>Hypercontractive semigroups</i>	258
10. <i>Graph Limits</i>	268
11. <i>The Feynman–Kac formula</i>	274
12. <i>Time-dependent Hamiltonians</i>	282
13. <i>Classical nonlinear wave equations</i>	293
14. <i>The Hilbert space approach to classical mechanics</i>	313
<i>Notes</i>	318
<i>Problems</i>	338
<i>Reader's Guide</i>	349
<i>List of Symbols</i>	353
<i>Index</i>	355
