# Table of Contents

<b>1 Introduction</b> .....	1
1.1 The Hausdorff Distance .....	4
1.1.1 Introduction to the Hausdorff Distance .....	4
1.1.2 Image Search Using the Hausdorff Distance .....	6
1.1.3 Handling Occlusion, Multiple Objects and Misdetection .....	7
1.1.4 Features and Correspondences .....	8
1.1.5 The Reverse Hausdorff Distance .....	11
1.1.6 Efficient Search .....	12
1.2 Previous Work .....	14
1.2.1 Interpretation Trees .....	14
1.2.2 Alignment .....	15
1.2.3 Hough Transforms .....	19
1.2.4 Geometric Hashing .....	20
1.2.5 Computational Geometry .....	21
1.2.6 Transformation Space Subdivision .....	23
1.2.7 Correlational Methods .....	23
1.2.8 Summary .....	26
<b>2 The Hausdorff Distance</b> .....	27
2.1 Definitions .....	27
2.2 The Minimum Hausdorff Distance under Transformation .....	28
2.3 Transformation Groups for Visual Recognition .....	33
2.3.1 Translation .....	34
2.3.2 Translation and Scale .....	35
2.3.3 Affine Transformation .....	36
2.4 The Partial Hausdorff Distance .....	37
2.4.1 Partial Distances Based on Ranking .....	37
2.5 The Box-Reverse Hausdorff Distance .....	40
2.6 Summary .....	42
<b>3 Exact Computation</b> .....	43
3.1 Summary of Methods .....	43
3.2 Lower Bounds .....	44
3.3 Point Sets under Translation .....	45
3.3.1 The $L_1$ and $L_\infty$ Example .....	46
3.3.2 The $L_2$ Example .....	49
3.4 Sets of Points and Line Segments under Translation .....	52
3.5 Point Sets under Rigid Motion .....	54
3.6 Sets of Points and Line Segments under Rigid Motion .....	56
3.7 Point Sets under Translation and Scale .....	57
3.7.1 The $L_2$ Example .....	58

3.7.2	The $L_1$ Example .....	59
3.7.3	The $L_\infty$ Example .....	59
3.8	Sets of Points and Line Segments under Translation and Scale .....	60
3.9	Point Sets under Affine Transformation .....	60
3.10	Sets of Points and Line Segments under Affine Transformation .....	61
3.11	Extension to the Partial Hausdorff Distance .....	61
3.12	Summary .....	62
<b>4</b>	<b>Rasterisation .....</b>	<b>63</b>
4.1	How To Rasterise .....	64
4.2	Computing the Minimum Hausdorff Distance .....	67
4.2.1	Bounding the Search .....	69
4.2.2	Locating Matches .....	70
4.3	The Distance Transform .....	70
4.4	Bounds on Rasterisation Error .....	73
4.5	Summary .....	75
<b>5</b>	<b>Efficient Computation .....</b>	<b>77</b>
5.1	Early Rejection .....	77
5.2	Ruling out Spheres .....	79
5.3	Skipping Forward .....	82
5.4	Cell Decomposition .....	84
5.5	Refinements of the Cell Decomposition Method .....	87
5.5.1	Variable Thresholds .....	87
5.5.2	Early Acceptance .....	88
5.5.3	The Box Distance Transform .....	90
5.5.4	Zoning .....	93
5.6	Directed Search Methods .....	93
5.6.1	Find Any Match .....	94
5.6.2	Find the Best Match .....	95
5.6.3	Incorporating the Reverse Criterion .....	96
5.7	Parallelising .....	97
5.8	Interactions and Combinations .....	98
5.9	Summary .....	100
<b>6</b>	<b>Implementations and Examples .....</b>	<b>101</b>
6.1	Translation .....	101
6.2	Translation and Scale .....	105
6.3	Affine .....	116
6.4	Summary .....	130
<b>7</b>	<b>Applications .....</b>	<b>132</b>
7.1	Tracking .....	132
7.1.1	Introduction .....	132
7.1.2	Tracking Using the Hausdorff Distance .....	134
7.1.3	An Implementation of the Tracker .....	137

7.1.4	Extensions to the Basic Method .....	139
7.1.5	Summary .....	144
7.2	Navigation .....	145
7.2.1	Introduction .....	145
7.2.2	Determining the Range to the Landmark .....	146
7.2.3	Centering the Landmark in the Image .....	149
7.2.4	Locating the Landmark in the Image .....	150
7.2.5	The Overall Navigation Method .....	151
7.2.6	Some Experimental Results .....	153
7.2.7	Summary .....	156
7.3	Other Applications .....	156
<b>8</b>	<b>Conclusions</b> .....	<b>157</b>
8.1	Future Work .....	158
8.1.1	Grouping .....	158
8.1.2	Gradient Descent .....	159
8.1.3	Analog .....	160
8.1.4	Multichannel .....	160
8.1.5	Further Reading .....	161
<b>A</b>	<b>Computing Distance Transforms</b> .....	<b>163</b>
A.1	Chamfer Methods .....	163
A.2	Exact Methods .....	165
A.3	$z$ -Buffer Methods .....	168
A.4	Computing the Box Distance Transform $\Delta'[x, y]$ .....	169
A.5	Summary .....	170
	<b>Bibliography</b> .....	<b>171</b>
	<b>Index</b> .....	<b>177</b>

## List of Tables

1.1	Some lower bounds for the complexity of the Hausdorff distance. ....	12
3.1	Lower bounds for the complexity of the Hausdorff distance. ....	45
3.2	Time bounds for finding the exact minimum Hausdorff distance. ....	46
4.1	Bounds on error due to rasterisation and rounding. ....	76
6.1	Running times for locating the first scale test model. ....	110
6.2	Running times for locating the second scale test model. ....	114
6.3	The effects of the efficient search techniques on the scale tests. ....	115
6.4	The effects of the efficient search techniques on the affine tests. ....	131

## List of Figures

1.1	An example of model-based recognition. . . . .	3
1.2	An example of the Hausdorff distance image search method. . . . .	5
1.3	Unstable linear feature detection. . . . .	9
1.4	The problem with correspondence and unstable point feature detection. . . . .	10
1.5	Large errors caused by pinning. . . . .	10
1.6	Using the reverse distance to reject incorrect poses. . . . .	12
2.1	An illustration of the Hausdorff distance. . . . .	29
2.2	The difference between $H$ and $H_G$ . . . . .	30
3.1	The sets $A$ and $A^\epsilon$ for the $L_\infty$ lower bound for point sets under translation. . . . .	47
3.2	The sets $A^\epsilon$ and $B$ for the $L_\infty$ lower bound for point sets under translation. . . . .	47
3.3	Part of $S(A, \epsilon, B)$ for the $L_\infty$ lower bound for point sets under translation. . . . .	48
3.4	The sets $A$ and $A^\epsilon$ for the $L_2$ lower bound for point sets under translation. . . . .	50
3.5	The sets $A^\epsilon$ and $B$ for the $L_2$ lower bound for point sets under translation. . . . .	51
3.6	A closeup of the interesting region of the gap. . . . .	51
3.7	Part of $S(A, \epsilon, B)$ for the $L_2$ lower bound for point sets under translation. . . . .	53
3.8	The sets $A$ , $A^\epsilon$ and $B$ for points and segments under translation. . . . .	53
3.9	The interaction between $A_2^\epsilon$ and $B_2$ . . . . .	55
3.10	The minimum depth of the points of $B_2$ . . . . .	56
3.11	The sets $A$ , $A^\epsilon$ and $B$ for points and segments under rigid motion. . . . .	57
4.1	The distance transform, or Voronoi surface, of a point set. . . . .	71
4.2	The point set $I$ generating Fig. 4.1. . . . .	72
5.1	An example of early termination. . . . .	78
5.2	An example of ruling out a circle. . . . .	81
5.3	A possible scanning order to improve the performance of ruling out circles. . . . .	82
5.4	An array and its $+x$ distance transform. . . . .	83
5.5	The cell subdivision process. . . . .	86
5.6	An illustration of the box projection property. . . . .	91
6.1	Using borders to restrict the search range. . . . .	102
6.2	The first translation test image. . . . .	103
6.3	The first translation object model. . . . .	104
6.4	The first test image overlaid with the best match. . . . .	104
6.5	The second translation test image. . . . .	104
6.6	The second translation object model. . . . .	105
6.7	The second translation test image overlaid with the best match. . . . .	105
6.8	The third translation test image. . . . .	106
6.9	The third translation object model. . . . .	106
6.10	The third translation test image overlaid with the best match. . . . .	107
6.11	Incorrect matches (and one correct match) from binary correlation. . . . .	107
6.12	The first scale test model. . . . .	109

6.13	The first scale test example, part one. . . . .	110
6.14	The first scale test example, part two. . . . .	111
6.15	The first scale test example, part three. . . . .	112
6.16	Incorrect matching due to not using the reverse distance. . . . .	113
6.17	The second scale test model. . . . .	113
6.18	The second scale test example, part one. . . . .	115
6.19	The second scale test example, part two. . . . .	116
6.20	The model for the first affine example. . . . .	118
6.21	The first affine example, part one. . . . .	119
6.22	The first affine example, part two. . . . .	120
6.23	The second affine test. . . . .	121
6.24	The third affine test model. . . . .	123
6.25	The third affine test, part one. . . . .	124
6.26	The third affine test, part two. . . . .	125
6.27	The third affine test, part three. . . . .	126
6.28	The fourth affine test. . . . .	127
6.29	The rigid motion test model. . . . .	128
6.30	The rigid motion test image. . . . .	129
6.31	The rigid motion test results. . . . .	130
7.1	Six frames from a motion sequence and the corresponding models of the object being tracked. . . . .	135
7.2	Using the forward distance to locate a model in an image. . . . .	136
7.3	Six frames from a motion sequence and the corresponding models of the object being tracked. . . . .	141
7.4	Six frames from a motion sequence and the corresponding models of the two objects being tracked. . . . .	143
7.5	The Cornell mobile robot TOMMY. . . . .	147
7.6	Determining the range to the landmark. . . . .	148
7.7	Computing focal length. . . . .	149
7.8	An example of the navigation method, part one. . . . .	154
7.9	An example of the navigation method, part two. . . . .	155
8.1	Exploiting grouping. . . . .	158
A.1	An image and its vertical distance transform. . . . .	166
A.2	An example of processing an interval. . . . .	167
