

# SELECTED LOGIC PAPERS

**Gerald E. Sacks**

Department of Mathematics

Harvard University

and

Massachusetts Institute of Technology

USA

**World Scientific**

*Singapore • New Jersey • London • Hong Kong*

*Published by*

World Scientific Publishing Co. Pte. Ltd.

P O Box 128, Farrer Road, Singapore 912805

USA office: Suite 1B, 1060 Main Street, River Edge, NJ 07661

UK office: 57 Shelton Street, Covent Garden, London WC2H 9HE

**Library of Congress Cataloging-in-Publication Data**

Sacks, Gerald E.

Selected logic papers / Gerald E. Sacks.

p. cm. -- (World Scientific series in 20th century mathematics; vol. 6)

Includes bibliographical references.

ISBN 9810232675 (alk. paper)

1. Logic, symbolic and mathematical. I. Title. II. Series.

QA9.2.S23 1999

511.3--dc21

99-22812

**British Library Cataloguing-in-Publication Data**

A catalogue record for this book is available from the British Library.

The author and publisher would like to thank the following publishers of the various journals and books for their assistance and permission to include the selected reprints found in this volume:

Academic Press

American Mathematical Society

Association for Symbolic Logic

Elsevier Science Publishers

Gauthier-Villars

Johns Hopkins University Press

Polish Academy of Sciences

Princeton University Press

While every effort has been made to contact the publishers of reprinted papers prior to publication, we have not been successful in some cases. Where we could not contact the publishers, we have acknowledged the source of the material. Proper credit will be accorded to these publishers in future editions of this work after permission is granted.

# Contents

General Introduction	ix
[1] On the Degrees Less Than $0'$ , <i>Ann. Math.</i> <b>77</b> (1963) 211–231	1
[2] Recursive Enumerability and the Jump Operator, <i>Trans. Amer. Math. Soc.</i> <b>108</b> (1963) 223–239	22
[3] The Recursively Enumerable Degrees are Dense, <i>Ann. Math.</i> <b>80</b> (1964) 300–312	39
[4] A Simple Set Which is Not Effectively Simple, <i>Proc. Amer. Math. Soc.</i> <b>15</b> (1964) 51–55	52
[5] Metarecursive Sets (with <i>Georg Kreisel</i> ), <i>J. Symbolic Logic</i> <b>30</b> (1965) 318–338	57
[6] Post's Problem, Admissible Ordinals, and Regularity, <i>Trans. Amer. Math. Soc.</i> <b>124</b> (1966) 1–23	78
[7] On a Theorem of Lachlan and Martin, <i>Proc. Amer. Math. Soc.</i> <b>18</b> (1967) 140–141	101
[8] A Minimal Hyperdegree (with <i>Robin O. Gandy</i> ), <i>Fundamenta Math.</i> <b>61</b> (1967) 215–223	103
[9] Measure-Theoretic Uniformity in Recursion Theory and Set Theory, <i>Trans. Amer. Math. Soc.</i> <b>142</b> (1969) 381–420	112
[10] Recursion in Objects of Finite Type, <i>Proc. Int. Congress Math.</i> (1970), Vol. 1, 251–254	152
[11] Forcing with Perfect Closed Sets, <i>Proc. Symp. Pure Math.</i> , Vol. 13, Part 1, Axiomatic Set Theory (1971) 331–355	156
[12] The $\alpha$ -Finite Injury Method (with <i>Stephen G. Simpson</i> ), <i>Ann. Math. Logic</i> <b>4</b> (1972) 343–367	181

[13]	The 1-Section of a Type $n$ Object, <i>Generalized Recursion Theory</i> (edited by J. E. Fenstad and P. G. Hinman) (1974) 81–93	206
[14]	Remarks Against Foundational Activity, <i>Historia Math.</i> <b>2</b> (1975) 523–528	219
[15]	Countable Admissible Ordinals and Hyperdegrees, <i>Adv. Math.</i> <b>20</b> (1976) 213–262	225
[16]	The $k$ -Section of a Type $n$ Object, <i>Amer. J. Math.</i> <b>99</b> (1977) 901–917	275
[17]	Effective Bounds on Morley Rank, <i>Fundamenta Math.</i> <b>53</b> (1979) 111–121	292
[18]	Post's Problem, Absoluteness and Recursion in Finite Types, <i>The Kleene Symposium</i> (edited by J. Barwise, H. J. Keisler and K. Kunen) (1980) 201–222	303
[19]	On the Number of Countable Models, <i>Southeast Asian Conference on Logic</i> (edited by C.-T. Chong and M. J. Wicks) (1983) 185–195	325
[20]	Post's Problem in $E$ -Recursion, <i>Proc. Symp. Pure Math.</i> , Vol. 42 (1985) 177–193	336
[21]	The Limits of $E$ -Recursive Enumerability, <i>Ann. Pure Appl. Logic</i> <b>31</b> (1986) 87–120	353
[22]	Inadmissible Forcing (with T. A. Slaman), <i>Adv. Math.</i> <b>66</b> (1987) 1–30	387
[23]	Effective Forcing Versus Proper Forcing, <i>Ann. Pure Appl. Logic</i> <b>81</b> (1996) 171–185	417
