

Contents

Introduction	vii
Phase Space Discretization in Chaotic Dynamical Systems M. L. BLANK	1
G -Consistent Estimates of Eigenvalues and Eigenvectors of Matrices V. L. GIRKO	15
Circle Homeomorphisms with Weak Discontinuities K. M. KHANIN and E. B. VUL	57
Multidimensional KAM Theory from the Renormalization Group Viewpoint D. V. KOSYGIN	99
Symmetries on a Julia Set G. M. LEVIN	131
Renormalization Group and Renormalization Theory in p -Adic and Adelic Scalar Models M. D. MISSAROV	143
Space-Time Chaos in Chains of Weakly Interacting Hyperbolic Mappings YA. B. PESIN and YA. G. SINAI	165
Poisson Distribution in a Geometric Problem YA. G. SINAI	199
Singular Spectral Properties of a One-Dimensional Schrödinger Operator with Almost Periodic Potential S. YA. ZHITOMIRSKAYA	215
