Contents

| | |
|---|----|
| Introduction | 1 |
| Chapter 1. Basic Properties of Sobolev Spaces | 6 |
| § 1.1. The Spaces $L_p^l(\Omega)$, $V_p^l(\Omega)$ and $W_p^l(\Omega)$ | 6 |
| 1.1.1. Notation | 6 |
| 1.1.2. Local Properties of Elements in the Space $L_p^l(\Omega)$ | 7 |
| 1.1.3. Absolute Continuity of Functions in $L_p^1(\Omega)$ | 8 |
| 1.1.4. The Spaces $W_p^l(\Omega)$ and $V_p^l(\Omega)$ | 10 |
| 1.1.5. Approximation of Functions in Sobolev Spaces by Smooth Functions on Ω | 11 |
| 1.1.6. Approximation of Functions in Sobolev Spaces by Functions in $C^\infty(\bar{\Omega})$ | 13 |
| 1.1.7. Transformation of Coordinates in Norms of Sobolev Spaces | 15 |
| 1.1.8. Domains Starshaped with Respect to a Ball | 17 |
| 1.1.9. Domains of the Class $C^{0,1}$ or Domains Having the Cone Property | 18 |
| 1.1.10. The Sobolev Integral Representation | 20 |
| 1.1.11. Generalized Poincaré Inequality | 22 |
| 1.1.12. Completeness of $W_p^l(\Omega)$ and $V_p^l(\Omega)$ | 24 |
| 1.1.13. The Space $\dot{L}_p^l(\Omega)$ and its Completeness | 24 |
| 1.1.14. Dual of a Sobolev Space | 25 |
| 1.1.15. Equivalent Norms in $W_p^l(\Omega)$ | 26 |
| 1.1.16. Extension of Functions in $V_p^l(\Omega)$ onto R^n | 27 |
| 1.1.17. Comments to § 1.1. | 29 |
| § 1.2. Some Facts from Set Theory and Function Theory | 30 |
| 1.2.1. Two Theorems on Coverings | 30 |
| 1.2.2. Theorem on Level Sets of a Smooth Function | 33 |
| 1.2.3. Representation of the Lebesgue Integral as a Riemann Integral Along a Halfaxis | 36 |
| 1.2.4. A Formula for the Integral of the Modulus of the Gradient | 37 |
| 1.2.5. Comments to § 1.2. | 39 |
| § 1.3. Some Inequalities for Functions of One Variable | 39 |
| 1.3.1. The Case $p \leq q$ | 40 |

| | | |
|---|---|-----------|
| 1.3.2. | The Case $p > q$ | 45 |
| 1.3.3. | Three Inequalities for Functions on $(0, \infty)$ | 49 |
| 1.3.4. | Comments to § 1.3. | 51 |
| § 1.4. | Imbedding Theorems of Sobolev Type | 51 |
| 1.4.1. | D. R. Adams' Theorem on Riesz Potentials | 51 |
| 1.4.2. | An Estimate for the Norm in $L_q(R^n, \mu)$ by the Integral of the Modulus of the Gradient | 54 |
| 1.4.3. | An Estimate for the Norm in $L_q(R^n, \mu)$ by the Integral of the Modulus of the l -th Order Gradient | 57 |
| 1.4.4. | Corollaries of Previous Results | 59 |
| 1.4.5. | Generalized Sobolev Theorem | 60 |
| 1.4.6. | Compactness Theorems | 62 |
| 1.4.7. | A Multiplicative Inequality | 65 |
| 1.4.8. | Comments to § 1.4. | 68 |
| § 1.5. | More on Extension of Functions in Sobolev Spaces | 70 |
| 1.5.1. | Survey of Results and Examples of Domains | 70 |
| 1.5.2. | Domains in EV_p^1 which are not Quasidisks | 73 |
| 1.5.3. | Extension with Zero Boundary Data | 77 |
| § 1.6. | Inequalities for Functions that Vanish on the Boundary along with their Derivatives up to Some Order | 79 |
| 1.6.1. | Integral Representation for Functions of One Independent Variable | 79 |
| 1.6.2. | Integral Representation for Functions of Several Variables with Zero Boundary Data | 80 |
| 1.6.3. | Imbedding Theorems for Functions that Satisfy Zero Boundary Conditions | 82 |
| 1.6.4. | The Necessity of the Condition $l \leq 2k$ | 84 |
| Chapter 2. Inequalities for Gradients of Functions that Vanish on the Boundary | | 88 |
| § 2.1. | Conditions for the Validity of Certain Integral Inequalities (The Case $p = 1$) | 88 |
| 2.1.1. | A Condition in Terms of Arbitrary Admissible Sets ... | 88 |
| 2.1.2. | A Particular Case (The Condition in Terms of Balls) .. | 90 |
| 2.1.3. | One More Inequality Containing the Norms in $L_q(\Omega, \mu)$ and $L_r(\Omega, \nu)$ (The Case $p = 1$) | 91 |
| 2.1.4. | Two Examples of Inequalities Containing Concrete Measures | 91 |
| 2.1.5. | The Case of a Weighted Norm in the Right-Hand Side . | 92 |
| 2.1.6. | Inequalities of Hardy-Sobolev Type as Corollaries of Theorem 2.1.5/1 | 96 |
| § 2.2. | On the (p, Φ) -capacity | 99 |
| 2.2.1. | Definition and Some Properties of the (p, Φ) -capacity . | 99 |

| | | |
|--------|--|-----|
| 2.2.2. | Expression for the (p, Φ) -Capacity Containing an Integral over Level Surfaces | 102 |
| 2.2.3. | Lower Estimates for the (p, Φ) -Capacity | 104 |
| 2.2.4. | On the p -Capacity of a Ball | 106 |
| 2.2.5. | On the (p, Φ) -Capacity for $p = 1$ | 107 |
| § 2.3. | Conditions for the Validity of Integral Inequalities (The Case $p \geq 1$) | 107 |
| 2.3.1. | Estimate for the Integral Containing the (p, Φ) -Capacity of the Set \mathcal{N}_t | 107 |
| 2.3.2. | An Estimate for the Norm in Orlicz Space | 111 |
| 2.3.3. | The Sobolev Type Inequalities as Corollaries of Theorem 2.3.2 | 113 |
| 2.3.4. | A Multiplicative Inequality (The Case $p \geq 1$) | 117 |
| 2.3.5. | An Estimate for the Norm in $L_q(\Omega, \mu)$ with $q < p$ (The Necessary and Sufficient Condition) | 120 |
| 2.3.6. | An Estimate for the Norm in $L_q(\Omega, \mu)$ with $q < p$ (Sufficient Condition) | 122 |
| 2.3.7. | An Inequality with the Norms in $L_q(\Omega, \mu)$ and $L_r(\Omega, \nu)$ (The Case $p \geq 1$) | 124 |
| 2.3.8. | An Estimate for the Integral $\int_{\Omega} u ^2 d\sigma$ with a Charge σ . | 125 |
| 2.3.9. | A Multiplicative Inequality with the Norms in $L_q(\Omega, \mu)$ and $L_r(\Omega, \nu)$ (The Case $p \geq 1$) | 127 |
| § 2.4. | Continuity and Compactness of Imbedding Operators of $\dot{L}_p^1(\Omega)$ and $\dot{W}_p^1(\Omega)$ into the Orlicz Space | 128 |
| 2.4.1. | Conditions for Boundedness of Imbedding Operators . | 128 |
| 2.4.2. | Criteria for Compactness | 130 |
| § 2.5. | Application to the Spectral Theory of the Multi-dimensional Schrödinger Operator | 134 |
| 2.5.1. | Preliminaries and Notation | 134 |
| 2.5.2. | Positiveness of the Form $S_1[u, u]$ | 136 |
| 2.5.3. | Semiboundedness of the Schrödinger Operator | 137 |
| 2.5.4. | Discreteness of the Negative Spectrum | 140 |
| 2.5.5. | Discreteness of the Negative Spectrum of the Operator \tilde{S}_h for all h | 142 |
| 2.5.6. | Finiteness of the Negative Spectrum | 143 |
| 2.5.7. | Infiniteness and Finiteness of the Negative Spectrum of the Operator \tilde{S}_h for all h | 146 |
| 2.5.8. | Proofs of Lemmas 2.5.1 and 2.5.2 | 147 |
| § 2.6. | On a Degenerate Quadratic Form | 149 |
| § 2.7. | On the Completion in the Metric of a Generalized Dirichlet Integral | 152 |
| § 2.8. | Comments to Chapter 2. | 157 |

| | |
|---|-----|
| Chapter 3. On Summability of Functions in the Space $L^1_1(\Omega)$ | 160 |
| § 3.1. Preliminaries | 160 |
| 3.1.1. Notation | 160 |
| 3.1.2. Lemmas on Approximation of Functions in $W^1_{p,r}(\Omega)$ and $L^1_p(\Omega)$ | 161 |
| § 3.2. Classes of Sets \mathcal{F}_α and the Imbedding $L^1_1(\Omega) \subset L_q(\Omega)$ | 162 |
| 3.2.1. Classes \mathcal{F}_α | 162 |
| 3.2.2. A Technical Lemma | 165 |
| 3.2.3. The Imbedding $L^1_1(\Omega) \subset L_q(\Omega)$ | 167 |
| 3.2.4. The Function λ_M | 170 |
| 3.2.5. An Example of a Domain in \mathcal{F}_1 | 171 |
| § 3.3. Subareal Mappings and the Classes \mathcal{F}_α | 172 |
| 3.3.1. Subareal Mappings | 172 |
| 3.3.2. An Estimate for the Function λ in Terms of Subareal Mappings | 174 |
| 3.3.3. Estimates for the Function λ for Concrete Domains ... | 175 |
| § 3.4. Two-sided Estimates for the Function λ for the Domain in Nikodým's Example | 179 |
| § 3.5. Compactness of the Imbedding $L^1_1(\Omega) \subset L_q(\Omega)$ ($q \geq 1$) | 182 |
| 3.5.1. The Class \mathcal{F}_α | 182 |
| 3.5.2. A Criterion for Compactness | 183 |
| § 3.6. The Imbedding $W^1_{1,r}(\Omega, \partial\Omega) \subset L_q(\Omega)$ | 185 |
| 3.6.1. The Class $\mathcal{X}_{\alpha,\beta}$ | 185 |
| 3.6.2. Examples of Sets in $\mathcal{X}_{\alpha,\beta}$ | 185 |
| 3.6.3. On the Continuity of the Imbedding Operator $W^1_{1,r}(\Omega, \partial\Omega) \rightarrow L_q(\Omega)$ | 187 |
| § 3.7. Comments to Chapter 3. | 190 |
| Chapter 4. On Summability of Functions in the Space $L^1_p(\Omega)$ | 191 |
| § 4.1. Conductivity | 191 |
| 4.1.1. The Equivalence of Certain Definitions of Conductivity | 191 |
| 4.1.2. Some Properties of Conductivity | 193 |
| 4.1.3. The Dirichlet Principle with Prescribed Level Surfaces and its Corollaries | 194 |
| § 4.2. A Multiplicative Inequality for Functions that Vanish on a Subset of Ω | 195 |
| § 4.3. The Classes of Sets $\mathcal{F}_{p,\alpha}$ | 198 |
| 4.3.1. The Definition and Simple Properties of $\mathcal{F}_{p,\alpha}$ | 198 |
| 4.3.2. Identity of the Classes $\mathcal{F}_{1,\alpha}$ and \mathcal{F}_α | 199 |

| | | |
|---------|---|-----|
| 4.3.3. | A Necessary and Sufficient Condition for the Validity of a Multiplicative Inequality for Functions in $W^1_{p,s}(\Omega)$ | 200 |
| 4.3.4. | The Function $v_{M,p}$ and the Relationship of the Classes $\mathcal{I}_{p,\alpha}$ and \mathcal{J}_α | 202 |
| 4.3.5. | Estimates for $v_{M,p}$ for Certain Concrete Domains | 203 |
| § 4.4. | The Imbedding $W^1_{p,s}(\Omega) \subset L_{q^*}(\Omega)$ for $q^* < p$ | 207 |
| 4.4.1. | An Estimate for the Norm in $L_{q^*}(\Omega)$ with $q^* < p$ for Functions that Vanish on a Subset of Ω | 207 |
| 4.4.2. | The Class $\mathcal{H}_{p,\alpha}$ and the Imbedding $W^1_{p,s}(\Omega) \subset L_{q^*}(\Omega)$ for $q^* < p$ | 209 |
| 4.4.3. | The Imbedding $L^1_p(\Omega) \subset L_{q^*}(\Omega)$ for a Domain with Finite Volume | 210 |
| 4.4.4. | Sufficient Conditions for Belonging to $\mathcal{H}_{p,\alpha}$ | 211 |
| 4.4.5. | Necessary Conditions for Belonging to the Classes $\mathcal{I}_{p,\alpha}$, $\mathcal{H}_{p,\alpha}$ | 214 |
| 4.4.6. | Examples of Domains in $\mathcal{H}_{p,\alpha}$ | 215 |
| 4.4.7. | Other Descriptions of the Classes $\mathcal{I}_{p,\alpha}$ and $\mathcal{H}_{p,\alpha}$ | 217 |
| 4.4.8. | Integral Inequalities for Domains with Power Cusps | 218 |
| § 4.5. | More on the Nikodým Example | 220 |
| § 4.6. | Some Generalizations | 228 |
| § 4.7. | The Inclusion $W^1_{p,r}(\Omega) \subset L_q(\Omega)$ ($r > q$) for Domains with Infinite Volume | 232 |
| 4.7.1. | The Classes \mathcal{I}_α and $\mathcal{J}_{p,\alpha}$ | 232 |
| 4.7.2. | The Imbedding $W^1_{p,r}(\Omega) \subset L_q(\Omega)$ ($r > q$) | 235 |
| 4.7.3. | Example of a Domain in the Class $\mathcal{I}_{p,\alpha}$ | 237 |
| 4.7.4. | The Space $L^1_p(\Omega)$ and Its Imbedding into $L_q(\Omega)$ | 238 |
| 4.7.5. | On the Poincaré Inequality for Domains with Infinite Volume | 239 |
| § 4.8. | On the Compactness of the Imbedding $L^1_p(\Omega) \subset L_q(\Omega)$ | 242 |
| 4.8.1. | The Classes $\mathcal{I}_{p,\alpha}$, $\mathcal{H}_{p,\alpha}$ | 243 |
| 4.8.2. | A Criterion for Compactness | 243 |
| 4.8.3. | Sufficient Conditions for Compactness of the Imbedding $L^1_p(\Omega) \subset L_{q^*}(\Omega)$ | 244 |
| 4.8.4. | A Compactness Theorem for an Arbitrary Domain with Finite Volume | 245 |
| 4.8.5. | Examples of Domains in the Class $\mathcal{I}_{p,\alpha}$ | 246 |
| § 4.9. | On the Imbedding $L^1_p(\Omega) \subset L_q(\Omega)$ | 247 |
| § 4.10. | Application to the Neumann Problem for Strongly Elliptic Operators | 249 |
| 4.10.1. | Second Order Operators | 249 |
| 4.10.2. | The Neumann Problem for Operators of Arbitrary Order | 250 |

| | | |
|--|--|-----|
| 4.10.3. | The Neumann Problem for a Special Domain | 253 |
| 4.10.4. | A Counterexample to Inequality (4.10.2/4) | 257 |
| § 4.11. | Inequalities Containing Integrals over the Boundary | 257 |
| 4.11.1. | The Imbedding $W_{p,r}^1(\Omega, \partial\Omega) \subset L_q(\Omega)$ | 257 |
| 4.11.2. | The Classes $\mathcal{J}_{p,\alpha}^{(n-1)}, \mathcal{J}_\alpha^{(n-1)}$ | 260 |
| 4.11.3. | Examples of Domains in $\mathcal{J}_{p,\alpha}^{(n-1)}, \mathcal{J}_\alpha^{(n-1)}$ | 261 |
| 4.11.4. | Estimates for the Norm in $L_q(\partial\Omega)$ | 262 |
| 4.11.5. | The Class $\mathcal{J}_{p,\alpha}^{(n-1)}$ and Theorems on Compactness | 264 |
| 4.11.6. | Application to Boundary Value Problems for Second Order Elliptic Equations | 266 |
| § 4.12. | Comments to Chapter 4. | 268 |
| Chapter 5. On Continuity and Boundedness of Functions in Sobolev Spaces | | 270 |
| § 5.1. | On the Imbedding $W_p^1(\Omega) \subset C(\Omega) \cap L_\infty(\Omega)$ | 270 |
| 5.1.1. | Criteria for the Continuity of the Imbedding Operators of $W_p^1(\Omega)$ and $L_p^1(\Omega)$ into $C(\Omega) \cap L_\infty(\Omega)$ | 270 |
| 5.1.2. | A Sufficient Condition in Terms of λ_M for the Imbedding $W_p^1(\Omega) \subset C(\Omega) \cap L_\infty(\Omega)$ | 273 |
| § 5.2. | On a Multiplicative Estimate for the Modulus of a Function in $W_p^1(\Omega)$ | 274 |
| 5.2.1. | Conditions for the Validity of a Multiplicative Inequality | 274 |
| 5.2.2. | On the Multiplicative Inequality in the Limit Case $r = (p-n)/n$ | 276 |
| § 5.3. | On the Modulus of Continuity of Functions in $L_p^1(\Omega)$ | 279 |
| § 5.4. | On the Boundedness of Functions with Derivatives in Orlicz Classes | 281 |
| § 5.5. | On the Compactness of the Imbedding $W_p^1(\Omega) \subset C(\Omega) \cap L_\infty(\Omega)$ | 284 |
| 5.5.1. | A Criterion for Compactness | 284 |
| 5.5.2. | A Sufficient Condition for Compactness in Terms of the Function λ_M | 285 |
| 5.5.3. | A Domain for Which the Imbedding Operator of $W_p^1(\Omega)$ into $C(\Omega) \cap L_\infty(\Omega)$ is Bounded but not Compact | 286 |
| § 5.6. | Generalizations to Sobolev Spaces of an Arbitrary Integer Order | 288 |
| 5.6.1. | On the (p, l) -conductivity | 288 |
| 5.6.2. | The Imbedding $L_p^l(\Omega) \subset C(\Omega) \cap L_\infty(\Omega)$ | 289 |
| 5.6.3. | The Imbedding $V_p^l(\Omega) \subset C(\Omega) \cap L_\infty(\Omega)$ | 290 |
| 5.6.4. | The Compactness of the Imbedding $L_p^l(\Omega) \subset C(\Omega) \cap L_\infty(\Omega)$ | 291 |

| | | |
|---|--|------------|
| 5.6.5. | Sufficient Conditions for the Continuity and the Compactness of the Imbedding $L^l_p(\Omega) \subset C(\Omega) \cap L_\infty(\Omega)$ | 292 |
| 5.6.6. | On Imbedding Operators for the Space $W^l_p(\Omega) \cap \dot{W}^k_p(\Omega), l > 2k$ | 293 |
| Chapter 6. On Functions in the Space $BV(\Omega)$ | | 296 |
| § 6.1. | Properties of the Set Perimeter and of Functions in $BV(\Omega)$ | 296 |
| 6.1.1. | Definitions of the Space $BV(\Omega)$ and of the Relative Perimeter | 296 |
| 6.1.2. | Approximation of Functions in $BV(\Omega)$ | 297 |
| 6.1.3. | Approximation of Sets with Finite Perimeter | 299 |
| 6.1.4. | Compactness of the Family of Sets with Uniformly Bounded Relative Perimeters | 300 |
| 6.1.5. | Isoperimetric Inequality | 301 |
| 6.1.6. | An Integral Formula for the Norm in $BV(\Omega)$ | 301 |
| 6.1.7. | On the Imbedding $BV(\Omega) \subset L_q(\Omega)$ | 302 |
