Preface xi

Chapter 1 Kolmogorov's Forward, Basic Results 1
1.1 Kolmogorov's Forward Equation 1
1.1.1. Derivation of Kolmogorov's Forward Equation 1
1.1.2. Solving Kolmogorov's Forward Equation 4
1.2 Transition Probability Functions 11
1.2.1. Lipschitz Continuity and Convergence 12
1.3 Some Important Extensions 16
1.3.1. Higher Moments 16
1.3.2. Introduction of a Potential 19
1.3.3. Lower Triangular Systems 21
1.4 Historical Notes and Some Commentary 26

Chapter 2 Non-Elliptic Regularity Results 28
2.1 The Existence-Uniqueness Duality 29
2.1.1. The Basic Duality Result 29
2.1.2. Uniqueness of Solutions to Kolmogorov's Equations 31
2.2 Smoothness in the Backward Variable 33
2.2.1. Differentiating the Backward Variable 34
2.2.2. The Distribution of Derivatives 36
2.2.3. Uniqueness of Solutions to Kolmogorov's Equation 39
2.3 Square Roots 40
2.3.1. The Non-Degenerate Case 40
2.3.2. The Degenerate Case 41
2.4 Oleinik's Approach 43
2.4.1. The Weak Minimum Principle 43
2.4.2. Oleinik's Estimate 44
2.5 The Adjoint Semigroup 48
2.5.1. The Adjoint Transition Function 49
2.6 Historical Notes and Commentary 52

Chapter 3 Preliminary Elliptic Regularity Results 53
3.1 Integration by Parts 54
3.1.1. Gaussian Integration by Parts 54
3.1.2. A General Formula 55
3.2 Application to the Backward Variable 57
3.2.1. A Formula of Bismut Type 57

3.2.2. Higher Order Derivatives 61
3.3 Application to the Forward Variable 64
3.3.1. A Criterion for Absolute Continuity 65
3.3.2. The Inverse of the Jacobian 66
3.3.3. The Fundamental Solution 69
3.3.4. Smoothness in the Forward Variable 72
3.3.5. Gaussian Estimates 74
3.4 Hypoellipticity 77
3.4.1. Hypoellipticity of L 77
3.4.2. Hypoellipicity of $L + \partial_t$ 78
3.5 Historical Notes and Commentary 80

Chapter 4 Nash Theory 82

4.1 The Upper Bound 83
4.1.1. Nash's Inequality 83
4.1.2. Off-Diagonal Upper Bound 86
4.2 The Lower Bound 91
4.2.1. A Poincaré Inequality 92
4.2.2. Nash's Other Inequality 93
4.2.3. Proof of the Lower Bound 95
4.3 Conservative Perturbations 98
4.4 General Perturbations of Divergence Form Operators 106
4.4.1. The Upper Bound 107
4.4.2. The Lower Bound 110
4.5 Historical Notes and Commentary 115

Chapter 5 Localization 117

5.1 Diffusion Processes on $\mathbb{R}^N$ 117
5.2 Duhamel's Formula 119
5.2.1. The Basic Formula 120
5.2.2. Application of Duhamel's Formula to Regularity 121
5.2.3. Application of Duhamel's Formula to Positivity 123
5.2.4. A Refinement 127
5.3 Minimum Principles 130
5.3.1. The Weak Minimum Principle Revisited 130
5.3.2. A Mean Value Property 132
5.3.3. The Strong Minimum Principle 133
5.3.4. Nash's Continuity Theorem 133
5.3.5. The Harnack Principle of De Giorgi and Moser 136
5.4 Historical Notes and Commentary 138

Chapter 6 On a Manifold 140
6.1 Diffusions on a Compact Riemannian Manifold 140
6.1.1. Splicing Measures 141
6.1.2. Existence of Solutions 143
6.1.3. Uniqueness of Solutions 146
6.2 The Transition Probability Function on M 149
6.2.1. Local Representation of $P(t, x)$ 150
6.2.2. The Transition Probability Density 151
6.3 Properties of the Transition Probability Density 152
6.3.1. Smoothness in the Forward Variable 153
6.3.2. Smoothness in all Variables 154
6.4 Nash Theory on a Manifold 156
6.4.1. The Lower Bound 156
6.4.2. The Upper Bound 158
6.5 Long Time Behavior 163
6.5.1. Doeblin's Theorem 163
6.5.2. Ergodic Property 164
6.5.3. A Poincaré Inequality 165
6.6 Historical Notes and Commentary 167

Chapter 7 Subelliptic Estimates and Hörmander's Theorem 168
7.1 Elementary Facts about Sobolev Spaces 169
7.1.1. Tempered Distributions 169
7.1.2. The Sobolev Spaces 170
7.2 Pseudodifferential Operators 171
7.2.1. Symbols 173
7.2.2. Homogeneous Pseudodifferential Operators 175
7.2.3. Composition of Pseudodifferential Operators 178
7.2.4. General Pseudodifferential Operators 183
7.3 Hypoellipticity Revisited 185
7.3.1. Elliptic Estimates 185
7.3.2. Hypoellipticity 187
7.4 Hörmander's Theorem 187
7.4.1. A Preliminary Reduction 190
7.4.2. Completing Hörmander's Theorem 196
7.4.3. Some Applications 202
7.5 Historical Notes and Commentary 205

Notation 207
