Table of contents

Foreword	XV
Organization	XVII
<i>Opening Address</i>	
Geotechnical engineering in a changing world <i>J.L. Knill</i>	3
<i>Keynote Addresses</i>	
Assessing the risk of building damage due to tunnelling – lessons from the Jubilee Line Extension, London <i>J.B. Burland, J.R. Standing & F.M. Jardine</i>	17
An integrated natural hazard mitigation system for a densely populated city <i>C.D. Ou</i>	45
Chin Fung Kee Memorial Lecture The significance of ground characterisation for foundation deformation prediction <i>H.G. Poulos</i>	59
<i>1 Managing Risk in the Interests of Public Safety</i>	
Invited Paper – Reducing risks, protecting people <i>J.-M. Le Guen</i>	83
Landslide emergency service of the Government of Hong Kong Special Administrative Region (HKSAR) <i>Y.S. Au-Yeung, S.H. Tse & D.J. Howells</i>	97
Rational approaches for landslide risk management <i>K.K. Chit, R. Chowdhury, & P. Flentje</i>	103
Development of a management strategy for geotechnical structures in N. Ireland <i>D.A.B. Hughes, S.J. Cummings, I.G. Doran & V. Sivakumar</i>	109

Regional landslide hazard estimation, a GIS/decision tree analysis: Southeast Queensland, Australia <i>M.C. Hayne & D. Gordon</i>	115
Application of quantitative risk assessment in landslide risk management in Hong Kong <i>K.K.S. Ho & H.N. Wong</i>	123
Geological uncertainty and geotechnical risk determination <i>J.L. Knill</i>	129
Predicting landslides : assessment of an automated rainfall based landslide warning system <i>D.M. Lloyd, P L Wilkinson, M.A. Othman & M.G. Anderson</i>	135
Community based approach to landslide risk reduction <i>J.B. Massey, S.H. Mak & K.P. Yim</i>	141
Quantitative landslide risk assessment of Cairns, Australia <i>M. Michael-Leiba, G. Scott, F. Baynes & K. Granger</i>	149
An approach for area and site-specific natural terrain hazard and risk assessment, Hong Kong <i>R. Moore, S.R. Hencher & N.C. Evans</i>	155
Quantitative risk assessment of collapses of deep excavations in Hong Kong <i>J.W. Pappin, M. Ng, S. Venkatesh & Y.S. Au-Yeung</i>	161
Assessment of spatial variability using modified Barlett test <i>K.K. Phoon, S.T. Quek & P. An</i>	167
Aspects of natural terrain landslide protection in Hong Kong <i>C.Y. Wong & R.V. Kelsey</i>	173
Factors influencing liquefaction-induced damage to dwellings (in case of the 1983 Nihonkai-chubu earthquake) <i>K. Yoshikawa, A. Barrera Luna, T. Ito & A. Asada</i>	179
Prediction of susceptible zones for liquefaction-induced ground flow in Tokyo <i>S. Yasuda, Y. Shimizu, K. Koganemaru, R. Ioyama & E. Ishida</i>	185
2 Environmental Geotechnics	
Invited Paper – Waste containment and remediation of contaminated sites <i>M. Kamon</i>	193
Pulan Semakau offshore landfill project <i>S. Chee, S.K. Ho & R.G. Burkard</i>	207
A study on the utilization of waste landfill as construction sites <i>B.S. Chun & K.M. Kim</i>	213
A study on the utilization of PG pile in waste landfill <i>B.S. Chun & C.S. Choi</i>	219
Polymer gel barriers for waste disposal facilities <i>M.I.M. Darwish, P.L.J. Zitha, J.R.C. van der Maarel, L. Pel & H. Huinink</i>	225

Clay volume change caused by ion diffusion <i>C. Di Maio</i>	231
Design of a basal lining system to resist discontinuous deformations <i>D. Konig, Th. Triantafyllidis & R. Scherbeck</i>	237
Recycling of construction waste in Japan: current state of technology and challenges for the future <i>H. Miki</i>	243
Settlements of old landfills in Hong Kong <i>K.P. Yim</i>	249
3 The Value of Geotechnics in Construction	
Invited Paper – The value of geotechnics in design and construction <i>L.J. Endicott</i>	257
Geotechnical characterization coupled with GIS techniques <i>S. Campus, F. Forlati, F. Tamberlani & H. Sarri</i>	267
Undrained shear strength profiles of clay from in-situ tests <i>M.F. Chang, L.F. Cao & C.I. Teh</i>	273
A case study on long-term settlement of an MRT depot <i>C.T. Chang, J.S. Fang, J.H. Chen & C.Y. Yu</i>	279
Strength and deformation characteristics of cement treated marine clay <i>S.H. Chew, A.M.H. Kamruzzaman & F.H. Lee</i>	285
A comparison between tender, detailed design and the field performance of diaphragm walls in Bangkok <i>J. Davies, P. Thompson & S. Young</i>	291
Geotechnical parameters for hydraulically placed fill <i>J.A. Davies & S. Hope</i>	297
Fast track construction of the airport platform at Chek Lap Kok through geotechnical/civil engineering planning and design <i>L.J. Endicott & R.A. Fraser</i>	303
Estimating ground movements in a very stiff lodgement till <i>E.R. Farrell & M.L. Lawler</i>	309
Performance monitoring of a rock-socketed caisson wall <i>K.K.S. Ho & S.H. Mak</i>	315
Hong Kong Disneyland Penny's Bay reclamation – stage 1 site characterisation <i>M.S. Hendy & C.J. Brown</i>	321
Rock engineering considerations in the planning and construction of the Sedrun shaft head <i>H. Hagedorn</i>	327
Mass modulus of rock for use in the design of deep foundations <i>S.J. Hill & M.I. Wallace</i>	333

The effectiveness of jet-grout slabs and cross-walls in restricting wall movements in deep excavations <i>B.B.C. Hsiung, D.F.T. Nash, K.H. Cheng, C.C. Huang & R.N.H. Hwang</i>	339
Weathering and stability of stone bridges in southern Kyushu, Japan <i>K. Jiang, T. Esaki & K. Watanabe</i>	343
Parametric study on settlement prediction of reclaimed land by dredged clay <i>M. Katagiri & M. Terashi</i>	349
The characteristics of buried karst and its influence on foundation design in the Northwest New Territories, Hong Kong SAR <i>K.W. Lai</i>	355
Design and construction of a 16m high reinforced fill retaining wall in Hong Kong <i>A.Y.T. Lam, K.W.K. Lau & C.K.T. Lee</i>	361
Performance monitoring of a 16m high reinforced fill retaining wall in Hong Kong <i>A.Y.T. Lam, K.W.K. Lau & C.K.T. Lee</i>	367
Sustainable geotechnical design for the Tsing Yi North Coastal Road, Hong Kong <i>A.Y.T. Lam & K.P. Yim</i>	373
Control of ground movement in the construction of Festival Walk <i>D.M. Lee, J.W. Pappin & J.G. Buckler</i>	379
The application of numerical analysis to geotechnical engineering projects <i>S.C.R. Lo, C.T. Gnanendran & K.S. Li</i>	383
Geological baselining of hill-based subdivisions east of Metro Manila, Luzon, Philippines <i>V.B. Maglambayan, G.P. Yumul, D.P. delos Angeles, J.V. de Jesus, F.A. Jimenez, E.S. Andal, H. Cabria & D.V. Faustino</i>	389
Natural and anthropogenic effects on offshore suspended sediment loads in Hong Kong; implications for dredging <i>S. Parry</i>	395
Self-boring pressuremeter testing in Bangkok subsoils <i>R.E. Prust, J.A. Davies & A.R. Gaba</i>	401
Performance of shaft grouted piles and barrettes <i>G.D. Plumbridge & S.J. Hill</i>	407
Geotechnical challenges in the construction of Thailand's first subway <i>C. Schulze</i>	413
Use of reinforced earth (RE) wall as an alternative to a bridge viaduct at Cyberport development, Hong Kong <i>Y.C. Shi & L.H. Swann</i>	419
Study on stability of soil around micro-tunnel construction using slurry pipe-jacking <i>H. Shimada, T. Sasaoka, S. Kubota & K. Matsui</i>	425
Settlements over close-proximity tunnels in saturated sands: prediction and performance <i>T.J.E. Sinclair & P.D. Norfolk</i>	431

"GIMS" – A client/server database system for management of geotechnical instrumentation data on West Rail <i>I.J. Solomon, H.F.C. Chan, J.P. Ireland, S.C. Lee & S.T. Fung</i>	437
Geotechnical design & construction aspects of the Tsing Tsuen Tunnels – KCRC West Rail Phase; Contract DB320 <i>R.B. Storry & A.S. Stenning</i>	443
Use of jet grouting technique in treating large deformation of tunnel <i>X.L. Sun & H.Z. Wang</i>	449
A numerical analysis of anchored diaphragm walls for a deep basement in Kuala Lumpur, Malaysia <i>Y.C. Tan, S.S. Liew, S.S. Gue & M.R. Taha</i>	453
The use of high capacity hydraulic injection piles for buildings in limestone ex-tin mining sites in Kuala Lumpur <i>S.M. Tan & C.H. Ling</i>	459
Experience of a deep excavation adjacent to critical structures <i>S.K. Tang, T.L. Lim, P.H. Lim, K.C. Tan & P.L. Leong</i>	465
A modification of the Hiley-formula for driving long piles and comparisons with test results in Hong Kong <i>Th. Triantafyllidis</i>	471
Finite element method applied to proprietary trench box installation <i>J.B. Wang & F.C. Harris</i>	477
4 Theoretical Advances and Scientific Innovations	
Static liquefaction of Sydney sand mixed with both plastic and non-plastic fines <i>D.C. Bobei & S.C.R. Lo</i>	485
Centrifuge model study on short rectangular piers against overturning <i>E.A. Dickin, G.J.W. King & K. Ilamparuthi</i>	491
Seismic response of single piles: experiment and prediction <i>H. Dou</i>	497
Suggestions and recommendations for the interpretation of soil-water characteristic curves <i>D.G. Fredlund, H. Rahardjo, E.C. Leong & C.W.W. Ng</i>	503
Seismic design methodology for buried structures <i>M.W. Free, J.W. Pappin, J.W.C. Sze & M.J. McGowan</i>	509
Some important aspects in evaluating cyclic triaxial tests on clayey soils <i>Y. Hu & H.G. Kempfert</i>	515
Shear strength and degradation characteristics of railway ballast <i>B. Indraratna & W. Salim</i>	521
One dimensional compression properties of crushable soils related to particle characteristics <i>Y. Kato, Y. Nakata, M. Hyodo, H. Murata & A.F.L. Hyde</i>	527

Evaluation of interparticle bonding and its damage for a cemented material <i>D. Katsuki, Y. Nakata, M. Hyodo, H. Murata & A.F.L. Hyde</i>	533
Centrifuge model tests on stabilities of double sheet pile wall cofferdam in sand <i>M.R.A. Khan, J. Takemura & H. Fukushima</i>	539
The use of artificial joints executed in blocks of rock for the study of the mechanics of rock mass discontinuities <i>M.J.A. Leal-Gomes</i>	547
Centrifuge model study of inclined piles <i>C.F. Leung, S. Srisakthivel & Y.K. Chow</i>	553
Shear deformation of silty sand under cyclic simple shear <i>M. Mohajeri & I. Towhata</i>	559
Constitutive modeling for coupled analysis of behaviour of seabed induced by sea wave <i>Y.P. Pathak, K. Miura, N. Yoshida & N.A. Minh</i>	565
Strength characteristics of geogrid fibre-soil composite <i>B.R. Phani Kumar</i>	571
Stress dependent permeability effects on ground water flow <i>J. Sadrekarimi & M. Sagafi</i>	575
Determination of G_{max} of residual soils using bender elements <i>J.H. Tou, E.C. Leong, H. Rahardjo & H.K. Cheong</i>	581
Development of a field device for indirect measurement of soil suction <i>S. Tripathy, E.C. Leong & H. Rahardjo</i>	587
A semi-analytical solution of one-dimensional consolidation of layered soils exhibiting rheological characteristics <i>K.H. Xie, L.H. Lan & K.H. Wang</i>	593
Anisotropy of highly-overconsolidated clay in small- and intermediate-strain levels <i>S. Yimsiri & K. Soga</i>	599
Response of a laterally loaded 4x4 battered pile group <i>L.M. Zhang & M.C. McVay</i>	605
Evaluation of a thermal conductivity sensor for measurement of negative pore-water pressures in residual soil slopes <i>X.H. Zhang, E.C. Leong & H. Rahardjo</i>	611
5 Professional Practice	
Invited Paper – An overview of professional practice of geotechnical engineering in Malaysia <i>S.S. Gue</i>	619
Panellist report – Qualification, registration and licensing of geotechnical practitioners in Hong Kong <i>J.B. Massey</i>	623
The geotechnical expert witness <i>D.B. Jones</i>	629

Last resort probably available to the aggrieved party in apportionment of risk in geotechnical engineering contracts <i>P.C. Wong & K.F. Man</i>	635
6 Specialty Session on Slope Engineering	
Invited Paper – Recent advances in slope engineering in Hong Kong <i>H.N. Wong</i>	641
Panellist report – Landscaping and bio-engineering of slopes in Hong Kong <i>R.P. Martin</i>	661
Panellist report – Engineering geology and ground characterisation in slope engineering <i>S.J. Wang</i>	671
Panellist report – Assessment and instrumentation of slopes for stability against rainfall <i>H. Rahardjo, E.C. Leong & R.B. Rezaur</i>	675
Applications of 3D slope stability analysis <i>E.N. Bromhead, G. Fowlas & A.A. Zemichael</i>	685
A systematic study of landslides along with arterial routes to Darjeeling and their control <i>S.R. Basu</i>	691
Innovative bioengineering techniques for rapid slope stabilisation <i>D.H. Barker</i>	697
Shallow landslides hazard assessment based on multidisciplinary studies <i>S. Campus, F. Forlati, H. Sarri & C. Scavia</i>	703
Enhancing slope safety through lessons learnt from landslides <i>R.K.S. Chan & K.K.S. Ho</i>	709
Development of a portable triple-tube sampler for slope investigations <i>M.H.C. Chan, B.N. Leung, P.L.R. Pang & S.M. Pyle</i>	715
Rockfall field test at Tung Shan Terrace, Hong Kong <i>K.T. Chau, R.H.C. Wong, K.W. Ho & L.M. Mak</i>	719
Numerical analysis of soil nails in loose fill slopes <i>C.Y. Cheuk, C.W.W. Ng & H.W. Sun</i>	725
Use of reliability method in slope design option selection <i>W.M. Cheung & W.H. Tang</i>	731
Geosynthetic reinforced fill barriers for landslide debris flows and boulder falls <i>J.W. Cowland</i>	737
Earth reinforcement potential of four tree species as determined by root system architecture <i>B.B. Docker & T.C.T. Hubble</i>	741
Strength and distribution of <i>Casuarina glauca</i> roots in relation to slope stability <i>B.B. Docker & T.C.T. Hubble</i>	745
Identification of clay-rich zones in weathered Hong Kong rocks affecting slope stability <i>C.A.M. Franks, S.D.G. Campbell, S. Parry & K.C. Lau</i>	751

The slope stability and its stabilization by means of auger pile for Khon Kaen loess <i>W. Gasaluck, P. Punrattanasin, P. Angsuwotai & C. Muktabhant</i>	757
Prediction and mitigation of natural terrain hazards, Yam O Tuk Service reservoir project, Hong Kong <i>T.H.H. Hui & A.Y.T. Lam</i>	763
The significance of massive relic landslides on recent large slope failures in Hong Kong <i>J.R. Hart, K.K.S. Ho & Y.C. Koo</i>	771
Design method for stabilizing piles to increase slope stability <i>S.S. Jeong & B.C. Kim</i>	777
The 1990 Tsing Shan debris flow <i>J.P. King</i>	783
Large-scale landsliding at Lake Singkarak, Sumatra, Indonesia <i>J.L. Knill</i>	789
Approach to quantitative prediction of landslides on natural mountain slopes, Korea <i>W.Y. Kim, B.G. Chae, K.S. Kim & Y.C. Cho</i>	795
Evaluation of soil-hydraulic properties and its effect on unsaturated seepage and slope stability analysis <i>M. Karthikeyan, T.S. Tan and K.K. Phoon</i>	801
Water films involved in post-liquefaction flow failure in Niigata City during the 1964 Niigata earthquake <i>T. Kokusho & K. Fujita</i>	807
The Foothills Bypass – from design to construction <i>N.P. Koor, D. Hadley & J.R. Hart</i>	813
Slip failures in granular slopes: some observations from model tests <i>W.K. Leong, J. Chu & D.W. Hight</i>	819
Probabilistic slope analysis involving generalized slip surface in stochastic soil medium <i>B.K. Low</i>	825
The acceptability and long-term performance of general fill in slope construction <i>K.T. Law & M.R. Thorn</i>	831
Effect of geogrid on reinforcing high slopes <i>C.N. Liu</i>	837
New initiatives to improve appearance of steep slopes <i>K.B. Ling, Y.K. Ho, W.P. Wong & M.K. Chang</i>	843
Evidence of a relict discontinuity-controlled slump failure mechanism in Hong Kong slopes <i>I.C. Muir, S.D.G. Campbell & K.K.S. Ho</i>	849
Slope Information System – an indispensable tool for Hong Kong slope safety management <i>S.H. Mak, T.M. Ma, T.P. Chan & D.C. Chan</i>	855
Bio-engineering and landscape treatment of slopes and retaining walls in Hong Kong's Landslip Preventive Measures Programme <i>R.P. Martin, C.O. Li & M.R. Pryor</i>	863

Application of backpropagation neural network for the prediction of slope movement <i>K.M. Neaupane, N.R. Adhikari & N. Gurung</i>	869
Bio-engineering on slopes for landslide stabilization and prevention in Malaysia <i>M.T. Noraini & J.A. Ghani</i>	875
Occurrence of flowslides in soils of pyroclastic origin and considerations for landslide hazard mapping <i>L. Olivares & L. Picarelli</i>	881
The natural terrain hazard study of Yam O Tuk : a case study <i>G. Pinches, A.D. Hardingham & A.R.H. Smallwood</i>	887
The origin and shear strength of kaolin-rich zones in Hong Kong <i>S. Parry, S.D.G. Campbell & G.J. Churchman</i>	893
Study on small scale nailed soil model walls <i>G.V. Ramalinga Raju, I.H. Wong & B.K. Low</i>	899
Debris flow mitigation by means of flexible barriers <i>H. Salzmann</i>	905
Integration of manmade slopes into Hong Kong's urban environment <i>B.R. Thomas, P.R. Sayer, C.A. Bridges & J. Knight</i>	911
Applicability of short drainage pipes to prevent shallow slope failures under rainfall <i>K. Ugai & F. Cai</i>	917
Three-dimensional stability analysis of slopes using a plastic limit method <i>Y.J. Wang, Z. Chen, C.F. Lee & J.H. Yin</i>	923
Examining the undrained localized shearing behavior of silty soils for landslides based on ring shear tests <i>G.H. Wang & K. Sassa</i>	929
Microstructural analysis of slip zones of Shek Kip Mei landslide, Hong Kong <i>B.P. Wen, A. Aydin & N.S. Duzgoren-Aydin</i>	935
Upgrading of old masonry retaining walls using prescriptive measures <i>A.C.W. Wong & W.K. Pun</i>	941
Effective data management for GIS-based 3D critical slip searching <i>M. Xie, T. Esaki, G. Zhou & Y. Mitani</i>	947
An identification of DEM parameters for rockfall analysis <i>T. Yamagami, J.C. Jiang & K. Yokino</i>	953
Mechanism of landslides in Izumi geological belt of Japan <i>R. Yatabe, N. Yagi, N.P. Bhandary & Y. Yoshida</i>	959
Application of the DDA method to the analysis of Large Block Test data <i>M.R. Yeung & S.C. Blair</i>	963
A case study: slope movement and heterogeneity <i>S.C.T. Yip</i>	969
