Table of contents

| | |
|--|------|
| Foreword | IX |
| Organization | XI |
| <i>1 Managing Risk in the Interests of Public Safety</i> | |
| Risk assessment and safety in geotechnics | 977 |
| M. Ziegler | |
| <i>2 Environmental Geotechnics</i> | |
| Environmental considerations of landfill near a Jinkeng Reservoir in Guangzhou, China | 983 |
| A. Ho, J. Lui & Q. Shi | |
| Influence of headspace concentration of gasoline-contaminated soils | 987 |
| J. Sugawara & K.T. Law | |
| Leaching column tests on three estuarine alluvial soils from South Wales, United Kingdom | 991 |
| W.Y. Wan Zuhairi, B.K. Tan & R.N. Yong | |
| <i>3 The Value of Geotechnics in Construction</i> | |
| Lateral resistance behaviour of deep foundations in slopes | 997 |
| K.S. Chae, K. Ugai & A. Wakai | |
| On the physical and identification properties of a slightly organic deposit | 1001 |
| P.A.L.F. Coelho & L.J.L. Lemos | |
| Finite element analysis of tapered piles subjected to axial loading | 1005 |
| M. Ghazavi & M.A. Etaati | |
| Numerical analysis of the influence of soil nails on the stability of construction pits | 1009 |
| Y.H. Hao & R. Azzam | |
| Design of a groundwater lowering system at hillside | 1015 |
| J.T. Huang, K.K. Yeung & D.H. Wong | |
| Axial capacity of bored piles and pile groups in cemented desert sands | 1021 |
| N.F. Ismael | |

| | |
|---|------|
| Excavation in soft clay with soil improved by jet grouting <i>K.S. Khoo & X.J. Xie</i> | 1025 |
| A basement excavation using tie back, internal horizontal strutting and inclined-struts-and-berm system <i>C.S. Lim, S.M. Tan & L.C. Hiew</i> | 1031 |
| Changes in the gas permeability of compacted clay liner (CCL) sample under various compaction conditions <i>S. Moon, J.Y. Kim, M. Chung & K. Nam</i> | 1037 |
| Performance of lime-coated granite aggregates in asphalt mixes <i>R. Muniandy, R.S. Radin Umar, S. Hassim, J. Vasudevan, H. Omar & Z. Md. Yusof</i> | 1041 |
| Ground improvement using fly ash <i>S.A. Raza, M.S. Ahmad & M.A. Khan</i> | 1045 |
| Deformation behaviour of a retaining wall for a deep basement excavation with semi-top down method <i>S.B. Talha</i> | 1049 |
| Analysis of sheet pile deflection for deep braced excavation in soft Bangkok clay <i>W. Teparaksa</i> | 1055 |
| Pressuremeter tests for geotechnical site investigation in Singapore <i>K. Winn, C.P. Seh & L. Lewis</i> | 1059 |
| Case study on the behaviour of driven steel tubular piles <i>J.B. Wang & L.H. Swann</i> | 1063 |
| Auger-injected piles floating above karstic marble <i>C.M. Wong & Y.P. Tse</i> | 1067 |
| Construction and design of hand-dug caisson foundation in Malaysia <i>Y.W. Yee, J.K.L. Pan & Y.Y. Guo</i> | 1071 |
| 4 Theoretical Advances and Scientific Innovations | |
| Centrifuge tests on the failure mechanism of dykes <i>H.G.B. Allersma & A. Rohe</i> | 1077 |
| Secondary compression of clays <i>H.N. Bui, J.C. Small & T. Hull</i> | 1081 |
| Direct shear strength of a compacted unsaturated silty soil subjected to high total suction <i>T. Nishimura & K. Komagome</i> | 1085 |
| Change of undrained shear strength of very soft clay during consolidation <i>Y. Tanaka, G. Imai & M. Katagiri</i> | 1089 |
| Time dependent flow in porous media with variable coefficient of permeability <i>M.M. Toufigh</i> | 1093 |
| The evolution of damage around an opening in non-persistent jointed rock mass <i>R.H.C. Wong, E.Y.M. Li, P.C.W. Wong & K.T. Chau</i> | 1097 |

| | |
|--|------|
| Axi-symmetric solutions for layered and porous viscoelastic media <i>L. Yu & G.J. Chen</i> | 1101 |
| Further research about passive soil pressure <i>X.Q. Yang, S.X. He & Z.D. Liu</i> | 1105 |
| 5 Specialty Session on Slope Engineering | |
| Stabilization of a failed slope with reinforced soil wall <i>C.S. Chen</i> | 1111 |
| Analysis of "creep type" landslide using survey data of surface displacement in landslide area <i>J. Gunatilake, Y. Iwao, A. Saito & K. Kawasoe</i> | 1115 |
| Stability of a high cut in phyllite for the Kali Gandaki Hydropower Plant in Nepal <i>N. Kapali, D. Pant, W. Riemer & S. Shah</i> | 1119 |
| A case study – stabilization work to unstable crib wall in residual granite <i>S.K. Kong</i> | 1125 |
| Evaluation of slope stability with discriminant analysis <i>H.J. Liao, Y.C. Lin & R.T. Liao</i> | 1131 |
| Monitoring of slope movement during remedial works <i>S. Maail, H. Omar & D. Lloyd</i> | 1135 |
| WWW database of large landslides in Hong Kong – a resource for research and teaching <i>A.W. Malone & S.R. Hencher</i> | 1139 |
| Slope evaluation based on geological rating and potential instability <i>H. Omar, M. Daud, B. Mohd Zohadie, A.R. Malik, M.M.N. Megat Johari, R.S. Radin Umar & M. Ratnasamy</i> | 1143 |
| Stability analysis of bermed embankment on soft clay <i>T. Ruenkraiengsa & P. Promputthangkoon</i> | 1147 |
| Assessment of slope stability during the change of matric suction <i>C.H. Ryu & S.K. Kim</i> | 1151 |
| Rehabilitation design of distressed cut slope in weathered rocks with relict structures <i>K.S. Soo & T.S. Yee</i> | 1155 |
| Modular neural networks for rock slope stability assessment <i>Y. Xia, Q. Xie & B. Sha</i> | 1159 |
| Time prediction of landslide by gray system model <i>K. Yin & G. An</i> | 1163 |
| Author index | 1167 |
