Foreword xiii

Preface xvii

Part 1. A Survey

Asymptotic Methods in Mechanics with Applications to Thin Shells and Plates
S. M. Bauer, S. B. Filippov, A. L. Smirnov, and P. E. Tovstik 3

Introduction 3

Chapter 1. Asymptotic Expansions 5
1.1. Function estimations 5
1.2. Asymptotic series 6
1.3. Laplace's method 8
1.4. Oscillatory integrals. The stationary phase method 10
1.5. The saddle point method 13
1.6. Asymptotic properties of Airy's functions 14
1.7. The index of variation of a function 17
1.8. Newton polygon 20

Chapter 2. Singular Perturbation of Linear Differential Equations 23
2.1. Introduction 23
2.2. Solution of system (2.1.1) without turning points 25
2.3. Construction of solutions with turning points 31
2.4. Boundary value problems and Sturm–Liouville problems 37
2.5. Localized solutions of ordinary differential equations 43
2.6. Two-dimensional shell theories 47
2.7. One-dimensional problems of shell vibrations and buckling 52

Chapter 3. Degenerate Boundary Value Problems 61
3.1. Regular degeneracy of boundary value problems 61
3.2. Nonregular degeneracy 65
3.3. Degenerate thin shell boundary value problems 68
3.4. Vibrations of rotating shells of revolution 75

Chapter 4. Asymptotic Solutions of Partial Differential Equations 81
4.1. Introduction 81
4.2. Helmholtz's equation and its generalization 82

4.3. Degeneracy of two-dimensional boundary value problems 87
4.4. Local buckling and vibrations of shells 92
4.5. Asymptotics in narrow domains for thin shells and beams 97

Chapter 5. Asymptotic Solutions of Nonlinear Differential Equations 103
5.1. The Cauchy problem for ordinary differential equations 103
5.2. Degeneracy of nonlinear boundary value problems 106
5.3. The Liapunov–Schmidt perturbation method 109
5.4. Nonlinear shell buckling 118

References 129

Part 2. Thirteen Papers

Perturbation Methods in Eddy Current Testing
M. Ya. Antimirov, A. A. Kolyshkin and R. Vaillancourt 143

Buckling of Thin Cylindrical Shells and Shells of Negative Gaussian Curvature
S. M. Bauer, S. B. Filippov, A. L. Maiboroda, A. L. Smirnov and I. Yu. Teterin 153

Thermo-Elastic Deformations of Mirrors
S. M. Bauer and A. L. Smirnov 163

A Mathematical Model for Hydroelastic Problems with a Fluid Memory. Part I
B. A. Ershov, Yu. A. Mochalova and E. V. Polyakova 175

A Mathematical Model for Hydroelastic Problems with a Fluid Memory. Part II
B. A. Ershov and I. I. Strelkovskaya 185

Low-Frequency Vibrations of Cylindrical Shells. Part I: Shells with a Slanted Edge
S. B. Filippov 193

Low-Frequency Vibrations of Cylindrical Shells. Part II: Connected Shells
S. B. Filippov 205

Buckling of Convex Shells under Nonaxisymmetric Loading
A. L. Maiboroda 217

Elasto-Plastic Deformations of Ribbed Plates
G. V. Pavilainen 227

Elastic Wave Propagation through Elastic Shells
Yu. P. Shcheviev 235

Dynamic Stability and Forced Vibrations of a Horizontal Rotor with a Cracked Shaft
Yu. B. Shneerson 245

Edge Effect under Large Axisymmetric Deformations of Shells of Revolution
P. E. Tovstik 255

Turning Points and Caustics in Linear Problems of Thin Shell Free Vibrations and Buckling
P. E. Tovstik 271

About the Authors 279
