## Contents

Preface .....	VII
Conventions .....	XVII
<hr/>	
Introduction	1
<hr/>	
1    Couplings and changes of variables .....	5
2    Three examples of coupling techniques .....	21
3    The founding fathers of optimal transport .....	29
<hr/>	
Part I    Qualitative description of optimal transport	39
<hr/>	
4    Basic properties .....	43
5    Cyclical monotonicity and Kantorovich duality .....	51
6    The Wasserstein distances .....	93
7    Displacement interpolation .....	113
8    The Monge–Mather shortening principle .....	163
9    Solution of the Monge problem I: Global approach ...	205
10   Solution of the Monge problem II: Local approach ...	215

11	The Jacobian equation . . . . .	273
12	Smoothness . . . . .	281
13	Qualitative picture . . . . .	333

---

<b>Part II</b>	<b>Optimal transport and Riemannian geometry</b>	<b>353</b>
----------------	--	------------

---

14	Ricci curvature . . . . .	357
15	Otto calculus . . . . .	421
16	Displacement convexity I . . . . .	435
17	Displacement convexity II . . . . .	449
18	Volume control . . . . .	493
19	Density control and local regularity . . . . .	505
20	Infinitesimal displacement convexity . . . . .	525
21	Isoperimetric-type inequalities . . . . .	545
22	Concentration inequalities . . . . .	567
23	Gradient flows I . . . . .	629
24	Gradient flows II: Qualitative properties . . . . .	693
25	Gradient flows III: Functional inequalities . . . . .	719

---

<b>Part III</b>	<b>Synthetic treatment of Ricci curvature</b>	<b>731</b>
-----------------	---	------------

---

26	Analytic and synthetic points of view . . . . .	735
27	Convergence of metric-measure spaces . . . . .	743
28	Stability of optimal transport . . . . .	773

<b>29 Weak Ricci curvature bounds I: Definition and Stability .....</b>	795
<b>30 Weak Ricci curvature bounds II: Geometric and analytic properties.....</b>	847
<hr/>	
<b>Conclusions and open problems</b>	<b>903</b>
<hr/>	
<b>References .....</b>	915
<b>List of short statements .....</b>	957
<b>List of figures.....</b>	965
<b>Index .....</b>	967
<b>Some notable cost functions .....</b>	971
