<i>Preface</i>	<i>page</i> ix
1 Preliminaries	1
1.1 What is a plane curve?	1
1.2 Intersection numbers	6
1.3 Resultants and discriminants	8
1.4 Manifolds and the Implicit Function Theorem	9
1.5 Polar curves and inflections	12
2 Puiseux' Theorem	15
2.1 Solution in power series	15
2.2 Convergent power series	19
2.3 Curves, branches, multiplicities and tangents	27
2.4 Factorisation	31
2.5 Notes	34
2.6 Exercises	37
3 Resolutions	39
3.1 Puiseux characteristics	39
3.2 Blowing up	40
3.3 Resolution of singularities	42
3.4 Geometry of the resolution	46
3.5 Infinitely near points	49
3.6 The dual graph	57
3.7 Notes	63
3.8 Exercises	65
4 Contact of two branches	67
4.1 Exponents of contact and intersection numbers	67
4.2 The Eggers tree	75
4.3 The semigroup of a branch	78

vi	<i>Contents</i>	
4.4	Intersections and infinitely near points	88
4.5	Decomposition of transverse polar curves	91
4.6	Notes	94
4.7	Exercises	99
5	Topology of the singularity link	103
5.1	Vector fields	103
5.2	Knots and links	108
5.3	Description of the geometry of the link	111
5.4	Cable knots	116
5.5	The Alexander polynomial	122
5.6	Notes	128
5.7	Exercises	129
6	The Milnor fibration	131
6.1	Fibrations	131
6.2	The Milnor fibration	133
6.3	First properties of the Milnor fibre	139
6.4	Euler characteristics and fibrations	141
6.5	Further formulae for μ	144
6.6	Notes	151
6.7	Exercises	153
7	Projective curves and their duals	156
7.1	The genus of a singular curve	156
7.2	The degree of the dual curve	159
7.3	Constructible functions and Klein's equation	162
7.4	The singularities of the dual	170
7.5	Singularities of curves of a given degree	175
7.6	Notes	181
7.7	Exercises	184
8	Combinatorics on a resolution tree	187
8.1	The homology of a blow-up	187
8.2	The exceptional divisor of a curve	194
8.3	Functions on the tree	198
8.4	The topological zeta function	202
8.5	Calculations for a single branch	209
8.6	Notes	216
8.7	Exercises	217
9	Decomposition of the link complement and the Milnor fibre	219
9.1	Canonical decomposition theorems	220

<i>Contents</i>		vii
9.2	The complement of an algebraic link	224
9.3	Resolution and plumbing	227
9.4	The Eggers tree and the resolution tree	237
9.5	Finiteness of the monodromy	242
9.6	Seifert fibre spaces	243
9.7	The Eisenbud–Neumann diagram	247
9.8	Calculation of E–N diagrams	251
9.9	The polar discriminant	258
9.10	Notes	261
9.11	Exercises	263
10	The monodromy and the Seifert form	265
10.1	Definition of Seifert forms	266
10.2	Use of the Thurston decomposition	269
10.3	Calculation of the monodromy	272
10.4	Algebraic classification of Seifert forms	283
10.5	Hermitian forms	289
10.6	Signatures	297
10.7	Proof of 10.6.2 and 10.6.3	302
10.8	Notes	311
10.9	Exercises	314
11	Ideals and clusters	317
11.1	Blowing up ideals	317
11.2	The valuative closure of an ideal	323
11.3	Ideals and clusters	328
11.4	Integrally closed ideals	335
11.5	Jets and determinacy	341
11.6	Local rings and differentials	348
11.7	Notes	352
11.8	Exercises	354
	<i>References</i>	357
	<i>Index</i>	368
