

The picture on the front cover shows the old Castel dell'Ovo, built by the Normans in the 12th century on a tuffaceous islet present just in front of the hotel where the Symposium will take place. The castel, whose walls are also constituted by tuff stones, is a symbol of the relevance of such material for the town.

This symposium was organised under the auspices of:
 International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE)
 International Society for Rock Mechanics (ISRM)
 International Association for Engineering Geology and the Environment (IAEG)
 Associazione Geotecnica Italiana (AGI)

The texts of the various papers in this volume were set individually by typists under the supervision of each of the authors concerned.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by A.A. Balkema, Rotterdam, provided that the base fee of US\$ 1.50 per copy, plus US\$ 0.10 per page is paid directly to Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 90 5809 018 3/98 US\$ 1.50 + US\$ 0.10.

Table of contents

<i>2 Selection of soil parameters: Modelling the soil behaviour (continued)</i>	
A framework for the mechanical behaviour of structured soils <i>M.J.Kavvas & A.G.Anagnostopoulos</i>	591
A plasticity approach for the mechanical behaviour of structured soils <i>M.J.Kavvas & A.Amorosi</i>	603
Creep and apparent preconsolidation in carbonate soils <i>R.Lagioia</i>	615
Influence of pore water on the mechanical behaviour of a calcarenite <i>R.Lagioia, J.B.Burland & P.Delage</i>	623
Pre-yield behaviour of the Gravina calcarenite at small strains <i>R.Lagioia, J.B.Burland & P.Delage</i>	629
Stiffness and strength characteristics of a hard lodgement till <i>B.Lehane & A.Faulkner</i>	637
Thermo-hydro-mechanical coupling in clay barriers <i>X.L.Li, F.Collin, J.P.Radu & R.Charlier</i>	647
Déformabilité d'une marne chargée par des remblais <i>J.P.Magnan, B.Bescond & J.F.Serratrice</i>	659
Influence of matric suction on stiffness of a compacted silty sand <i>C.Mancuso, C.Rampino & F.Vinale</i>	669
Different stress-strain models for hard and soft soils? An experimental investigation <i>Ch.N.Marangos</i>	675
Proposal for differentiation of the empirical settlement prediction method of Terzaghi and Peck for soft and hard soils <i>Ch.N.Marangos</i>	687
An analytical viscoplastic model for the creep behaviour of a porous weak rock <i>E.Maranini & M.Brignoli</i>	697
Characterization of a complex soil <i>L.Montrasio</i>	707

Analysis of residual tropical cemented soil behaviour <i>T.S.Nagaraj, K. Nagendra Prasad, V.M.Chandra Reddy & N.Govinda Reddy</i>	715	Microstructure and scale effect in rock hardness tests <i>J.Sulem & I.Vardoulakis</i>	881
Extracting constitutive behaviour laws from triaxial test programs in shale <i>P.A.Nawrocki & M.B.Dusseault</i>	725	Anisotropy and heterogeneity of gravelly soil layer in Hualien, Taiwan <i>Y.Tanaka & T.Okamoto</i>	889
A constitutive model for soft rock with both strain softening and negative dilatancy <i>F.Oka, T.Adachi & A.Yashima</i>	737	Mechanical behaviour of the Orvieto tuff <i>P.Tommasi & R.Ribacchi</i>	901
Interpretation of plate loading test on siltstone <i>T.Okada, K.Tani, Y.Tanaka & K.Momose</i>	745	Modeling of the mechanical behaviour of conchyliates shellstone <i>I.Vardoulakis, S.K.Kourkoulis & C.Zambas</i>	911
Evaluation of the size effect on the strength of cement-treated soils <i>K.Omine, H.Ochiai, N.Yasufuku & N.Hayashi</i>	751	A rational approach to model the behavior of bonded soils <i>A.Vatsala, K.Nagendra Prasad, B.R.Srinivasa Murthy & T.G.Sitharam</i>	923
Degradation of weak sandstone and continuum damage model <i>Y.W.Pan & J.Y.Lee</i>	761	Cyclic stiffness and damping ratio of lightweight geomaterials using fly ash <i>K.Yasuhara, H.Kanazawa, S.Murakami, S.Yamazaki, H.Kiku & H.Kawano</i>	929
Ingredients for modelling the mechanical behaviour of intensely fissured clay shales <i>L.Picarelli & L.Olivares</i>	771	Drained cyclic response of an artificially cemented calcareous sand <i>C.K.Yeoh & D.W.Airey</i>	935
Isotropic/anisotropic behaviour of a compacted silty sand under controlled suction tests <i>C.Rampino, C.Mancuso & F.Vinale</i>	781		
Computational modeling of strain localization in soft rock <i>R.A.Regueiro, T.Y.Lai & R.I.Borja</i>	789	3 Tunnelling and underground openings	
Parameter changes after weathering of soft rock in flysch <i>T.Roje-Bonacci</i>	799	Field measurements and numerical assessment of deformations induced by tunnel excavation in loose and coarse soils <i>H.Amamiya, Y.Miyagawa, E.Kawakami, T.Nagai & S.Sakurai</i>	945
The role of dynamic measurements in characterizing the mechanical behaviour of a high porosity rock <i>T.Rotonda</i>	805	Instrumentation programme near the face of an advancing tunnel in Boom Clay <i>F.Bernier & L.Van Cauwercq</i>	953
A kinematic hardening model for structured clays <i>M.Rouainia & D.Muir Wood</i>	817	Behaviour of a tunnel face reinforced by bolts: Comparison between analytical-numerical models <i>D.Dias, D.Subrin, H.Wong, P.Dubois & R.Kastner</i>	961
On the use of direct and indirect methods in defining geomechanical properties of weak and complex rock masses – Application: Borzoli Cavern <i>G.Russo, G.Scotti & J.Habimana</i>	825	Design studies of caverns in alpine saliniferous rock <i>R.Galler</i>	973
A numerical approach for the prediction of shear strength of stiff fissured clay samples based on direct shear tests and FLAC modelling <i>A.Sabzalisenjani & H.Nikraz</i>	833	Flexible lining or NATM versus stiff lining or sprayed concrete lining (SCL) <i>J.Launay</i>	977
Effects of strain rate and ageing on small strain behaviour of a compacted silty sand <i>F.Santucci de Magistris, F.Tatsuoka, T.Sato & J.Koseki</i>	843	Classifications including weathering state in rock <i>J.Launay</i>	989
Dilatancy and strength of a reconstituted overconsolidated clay <i>G.Scarpelli & E.Sakellariadi</i>	855	Convergence of backfilled underground openings in salt rock <i>S.Olivella, A.Gens & E.E.Alonso</i>	991
A constitutive model for hard soils <i>T.Schanz</i>	861	High speed railway line Cologne-Frankfurt: Tunnelling in soft rocks under high water pressure <i>H.Quick, J.Michael, U.Arslan & R.Katzenbach</i>	1001
Caractérisation des éboulis de pente à l'aide d'une grande boîte de cisaillement <i>R.Shirdam, R.M.Faure & J.P.Magnan</i>	869	Modern approach to solving geotechnical problems of high groundwater levels in the design and construction of underground structures <i>G.Rasula & M.Rasula</i>	1007

Initial support of the mixed ground eastern portal of the Mesochora highway tunnel <i>Y.Thanopoulos, A.I.Sofianos, A.Karinas & D.Katsaris</i>	1015
Joint support system for roadway within extremely soft rock in underground coal mine <i>C.Wang</i>	1021
Modeling of bolting support in tunnels taking account of non-simultaneous yielding of bolts and ground <i>H.Wong & E.Larue</i>	1027
4 <i>Cuttings and natural slopes</i>	
A case of plane shear slope instability during the severe rainfall event of 4-6 November 1994 in Piemonte, Italy <i>G.Barla, M.Barbero, M.Castelletto & G.Maderni</i>	1041
Slope stability in a sand/sandstone borderline material <i>M.E.Barton & A.Cresswell</i>	1051
Real-time monitoring of bluff stability at Woodway, Washington, USA <i>R.L.Baum, E.L.Harp, R.G.Lahusen, W.J.Likos & P.S.Powers</i>	1057
Displacements and stability of a cut in a hard jointed clay <i>B.D'Elia, F.Esu & P.Bertuccioli</i>	1067
Control and instrumentation for a one hundred meters high embankment <i>I.Escuder, J.Yuste & G.Bovio</i>	1075
Lateral load capacity of rigid socketed-piers in a creeping soft rock <i>A.Foriero</i>	1081
Swelling processes in sliding marly layers in the Langhe region, Italy <i>F.Forlati, R.Lancellotta, C.Scavia & L.Simeoni</i>	1089
Structural behaviour of soil-rockfill mixtures embankments <i>E.Fortunato & A.Veiga Pinto</i>	1101
Quelques spécificités de l'analyse de risque pour les ouvrages de géotechnique <i>J.P.Magnan, G.Sève & P.Pouget</i>	1109
Slope instability associated to clayey marls in the Cove of Banyalbufar, Mallorca Island, Spain <i>R.M.Mateos & M.Tsige</i>	1117
Observations of pore-water pressure and landslide movement in Tertiary soft rocks <i>S.Matsuura, S.Asano, T.Okamoto, Y.Takeuchi & S.M.Park</i>	1125
Bearing capacity of footing on sloped soft rock ground and its numerical calculation <i>M.Nishimura & K.Miura</i>	1129
Project of supporting measures by using Hoek-Brown failure criterion <i>D.Ocepek & G.Vogrinič</i>	1141
Deformation analysis in the presence of discontinuities <i>E.Sakellariadi & G.Scarpelli</i>	1153

Slow movements in a deep-seated slide in stiff jointed clays <i>A.Sciotti</i>	1161
Mechanical behaviour of flysch formation consolidated by anchor cables <i>A.Segalini, M.Migliazza, G.P.Giani & S.Tagliavini</i>	1169
Pore pressures in unstable slopes constituted by fissured clay shales <i>G.Urciuoli</i>	1177
Investigation of failure of a cut slope in soft rock <i>J.Vakili, M.Delattre & D.Chu</i>	1187
A great active landslide in Greece: Past, present and future <i>G.J.Vlavianos & C.K.Cathreptis</i>	1195
Author index	1201
