

Contents

Preface	v
1. Biotechnical Slope protection and Erosion Control <i>Gray, Donald H.</i>	1
2. Ground Behavior during Earthquake and its effect on Foundation Piles <i>Ishihara, Kenji</i>	15
3. The Leaning Tower of Pisa—Present Situation <i>Jamiolkowski, M.B.</i>	93
4. Structure—Medium Dynamic Interaction <i>Liao, Zhen-Peng</i>	131
5. Deep Compaction of Granular Soils <i>Massarsch, K. Rainer</i>	181
6. The Fourth Tidal Wave of Geotechnical Engineering <i>Qian, Qi-Hu</i>	225
7. Recipe to Define Near-Field Earthquake Motion for Structural Design <i>Sato, Tadanobu</i>	237
8. Environmental Geotechnical Problems caused by Urban Underground Engineering Activities <i>Sun, Jun</i>	269
9. Quay Walls of the Port of Rotterdam <i>Van Tol, A.F. and Gijt, J. De</i>	303
10. Vibration Screening with Wave Barriers <i>Woods, Richard D.</i>	325
11. Rayleigh Wave Dispersion and its Applications <i>Wu, Shiming</i>	349
12. Morphology, Ageing and Engineering Behavior of Sands <i>Yudhbir, J. Thomas and A. Rahim</i>	375
