CONTENTS

Preface v
Acknowledgments ix

PART I 1

1 AN INTRODUCTION TO MULTIMEDIA 3
1.1 What is multimedia? 4
1.2 Multimedia hardware 5
1.3 Multimedia networking 7
1.4 Multimedia software: applications 9
1.5 Multimedia software: environments 11

2 MEDIA TYPES 15
2.1 Nontemporal media types 17
2.1.1 Text 17
2.1.2 Image 22
2.1.3 Graphics 27
2.2 Temporal media types 33
2.2.1 Analog video 33
2.2.2 Digital video 45
2.2.3 Digital audio 55
2.2.4 Music 62
2.2.5 Animation 68
2.3 Other media types 70

2.3.3 Speech audio 73
2.3.4 Temporal sequences 74
2.3.5 Nontemporal video and animation 74
2.4 Comparisons 75

3 MULTIMEDIA ENVIRONMENTS 79
3.1 The CD family 80
3.1.1 CD-DA 83
3.1.2 CD+G, CD+MIDI 83
3.1.3 CD-ROM 83
3.1.4 CD-i 85
3.1.5 CD-ROM XA 85
3.1.6 CD-V 85
3.1.7 Photo CD 86
3.1.8 CD-R, CD-WO 87
3.1.9 Video CD 87
3.1.10 Future optical storage technologies 87
3.2 CD-i 89
3.2.1 CD-i overview 89
3.2.2 CD-i media types 89
3.2.3 CD-i media organization 91
3.2.4 CD-i architecture 93
3.2.5 CD-i operations 97
3.3 DVI 102
3.3.1 DVI overview 102
3.3.2 DVI media types 103
3.3.3 DVI media organization 105
3.3.4 DVI architecture 105
3.3.5 DVI operations 108
3.4 QuickTime 114
3.4.1 QuickTime overview 114
3.4.2 QuickTime media types 114
3.4.3 QuickTime media organization 116
3.4.4 QuickTime architecture 126
3.4.5 QuickTime operations 128
3.5 MPC/MME 131
3.5.1 MPC overview 131

3.5.4 MPC architecture 135
3.5.5 MME operations 137
3.6 Director 142
3.7 Standards for multimedia 145

PART II 149

4 OBJECT-ORIENTED MULTIMEDIA 151
4.1 Why objects? 152
4.2 Objects, classes, and related terms 153
4.3 Multimedia frameworks 157
4.4 A note on C++ 159
4.5 An example class hierarchy 161

5 A MULTIMEDIA FRAMEWORK 163
5.1 Framework overview 164
5.2 Media classes 165
5.2.1 Generic operations 166
5.2.2 Temporal media subclasses 168
5.2.3 Structured media and conversions 175
5.2.4 Media class summary 175
5.3 Transform classes 176
5.4 Format classes 180
5.5 Component classes 189
5.5.1 Generic operations 192
5.5.2 Ports and connectors 195
5.5.3 Component events 200
5.5.4 Component subclasses 201
5.6 An application – 'Hello World: The Video' 203
5.7 Framework summary 204

6 USING THE FRAMEWORK: TWO APPLICATIONS 209
6.1 Media processing platforms and component kits 210

6.2.2 Media classes for the virtual museum 212
6.2.3 Transform classes for the virtual museum 219
6.2.4 Format classes for the virtual museum 219
6.2.5 Components for the virtual museum 222
6.2.6 Component networks for the virtual museum 229
6.3 Video widgets and video actors 233
6.3.1 Video actors – concepts 235
6.3.2 Implementation of video actors 239
6.3.3 Examples of video actors 243
6.4 Summary 248

PART III 249

7 SOME RESEARCH PROBLEMS IN MULTIMEDIA PROGRAMMING 251
7.1 Composition 252
7.1.1 Mechanisms 252
7.1.2 Metaphors 253
7.2 Synchronization 255
7.2.1 Aspects of synchronization 256
7.2.2 Techniques 258
7.3 Interaction 261
7.4 Database integration 262

8 INTEGRATED MULTIMEDIA SYSTEMS 269
8.1 Polikom overview 270
8.1.1 Structure and status of the Polikom program 271
8.1.2 ATM outlook 273
8.2 The Communication Wall 274
8.2.1 Components for the Communication Wall 276
8.2.2 Basic Communication Wall 277
8.2.3 Communication Wall with static video background 278
8.2.4 Communication Wall with dynamic computer-generated background 279
8.2.5 Multi-participant Communication Wall

APPENDIX A: A MEDIA PROCESSING PLATFORM 283

APPENDIX B: A MEDIA COMPONENT KIT 289
B.1 Concrete media classes 289
B.2 Concrete transform classes 291
B.3 Concrete media format classes 291
B.4 Concrete component classes 294

APPENDIX C: ONLINE MULTIMEDIA INFORMATION SOURCES 297

GLOSSARY 299

BIBLIOGRAPHY 305
