

Table of Contents

Preface 10

CHAPTER 1. EVOLUTION TOWARDS AN INTEGRATED BROADBAND COMMUNICATION NETWORK

| | | |
|--------|--|----|
| 1.1. | Introduction | 14 |
| 1.2. | Current situation in the telecommunication world | 15 |
| 1.3. | Progress in technology : technology push | 18 |
| 1.3.1. | Progress in technology | 18 |
| 1.3.2. | System concept progress | 21 |
| 1.4. | Future service requirements : market pull | 24 |
| 1.4.1. | Residential subscriber expectations | 24 |
| 1.4.2. | Business subscriber expectations | 25 |
| 1.5. | Bibliography | 25 |

CHAPTER 2. TRANSFER MODES

| | | |
|----------|---|----|
| 2.1. | Introduction | 28 |
| 2.2. | History | 29 |
| 2.2.1. | Telegraphy | 29 |
| 2.2.2. | Telephony | 29 |
| 2.2.3. | Data | 30 |
| 2.3. | Performance requirements | 31 |
| 2.3.1. | Semantic transparency | 35 |
| 2.3.1.1. | Transmission errors | 38 |
| 2.3.1.2. | Switching/multiplexing errors | 40 |
| 2.3.1.3. | Error probability distribution model of the network | 41 |
| 2.3.2. | Time transparency | 45 |
| 2.3.3. | Network conditioning | 47 |

Table of contents

| | | |
|---------------------------------|--|-----|
| 2.4. | Description of transfer modes | 50 |
| 2.4.1. | Circuit switching | 50 |
| 2.4.2. | Multirate circuit switching | 52 |
| 2.4.3. | Fast circuit switching | 55 |
| 2.4.4. | Packet switching | 56 |
| 2.4.5. | Fast packet switching – asynchronous transfer mode | 58 |
| 2.4.5.1. | Basic definition | 59 |
| 2.4.5.2. | Performance characteristics | 62 |
| 2.4.5.3. | Definition of the information field length | 74 |
| 2.4.5.4. | Header functionality | 84 |
| 2.4.5.5. | Supportive functions | 91 |
| 2.5. | Bibliography | 94 |
| CHAPTER 3. ATM STANDARDS | | |
| 3.1. | Introduction | 102 |
| 3.1.1. | CCITT activities | 102 |
| 3.1.2. | ATM Forum activities | 103 |
| 3.1.3. | Overview | 103 |
| 3.2. | Basic principles of ATM | 104 |
| 3.2.1. | Information transfer | 104 |
| 3.2.2. | Routing | 105 |
| 3.2.3. | Resources | 107 |
| 3.2.4. | Signalling | 108 |
| 3.2.5. | Flow control | 108 |
| 3.2.6. | Operation and maintenance | 109 |
| 3.3. | BISDN reference configuration | 110 |
| 3.3.1. | Reference points | 111 |
| 3.3.2. | Functional grouping | 111 |
| 3.4. | BISDN layered model | 113 |
| 3.4.1. | Physical layer | 114 |
| 3.4.2. | ATM layer | 115 |
| 3.4.3. | ATM adaptation layer | 116 |
| 3.5. | The physical layer | 116 |
| 3.5.1. | General | 117 |
| 3.5.2. | Synchronous digital hierarchy based interface | 118 |
| 3.5.3. | Cell based interface | 120 |
| 3.5.4. | Plesiochronous digital hierarchy based interface | 121 |
| 3.5.5. | FDDI based interface | 122 |
| 3.5.6. | ATM specific transmission convergence sublayer functions | 124 |
| 3.6. | The asynchronous transfer mode layer | 128 |
| 3.7. | The ATM adaptation layer | 128 |
| 3.7.1. | Functions and types of adaptation layers | 128 |

Table of contents

| | | |
|--------|---|-----|
| 3.7.2. | Adaptation for constant bit rate services : AAL 1 | 130 |
| 3.7.3. | Adaptation for variable bit rate services : AAL 2 | 132 |
| 3.7.4. | Adaptation for data services : AAL 3/4 | 133 |
| 3.7.5. | Adaptation for data services : AAL 5 | 138 |
| 3.7.6. | Adaptation for signalling | 140 |
| 3.8. | Maintenance functions | 140 |
| 3.8.1. | Principles | 140 |
| 3.8.2. | OAM network layering | 141 |
| 3.8.3. | OAM of the physical layer | 143 |
| 3.8.4. | OAM of the ATM layer | 144 |
| 3.9. | Bibliography | 145 |

CHAPTER 4. BROADBAND ATM SWITCHING

| | | |
|----------|--|-----|
| 4.1. | Introduction | 147 |
| 4.2. | Switching requirements | 152 |
| 4.2.1. | Information rates | 153 |
| 4.2.2. | Broadcast/multicast | 153 |
| 4.2.3. | Performance | 153 |
| 4.3. | Basic switching building blocks | 155 |
| 4.3.1. | Queuing disciplines | 156 |
| 4.3.2. | Performance | 158 |
| 4.3.2.1. | Analytical models | 160 |
| 4.3.2.2. | Computer simulation | 167 |
| 4.3.3. | Implementation parameters of basic ATM switching building blocks | 168 |
| 4.3.4. | Knockout switching element | 172 |
| 4.3.5. | Roxanne switching element | 181 |
| 4.3.6. | Coprin switching element | 184 |
| 4.3.7. | Athena switching element | 188 |
| 4.4. | ATM switching fabrics | 192 |
| 4.4.1. | Multistage interconnection networks with internal cell loss | 195 |
| 4.4.1.1. | Roxanne switching fabric | 199 |
| 4.4.1.2. | Athena switching fabric | 204 |
| 4.4.2. | Multistage interconnection networks without internal cell loss | 209 |
| 4.4.2.1. | St. Louis switching fabric | 209 |
| 4.4.2.2. | Batcher-Banyan based MINs | 214 |
| 4.5. | Concluding remarks | 220 |
| 4.6. | Bibliography | 221 |

CHAPTER 5. IMPACT OF ATM ON TERMINALS AND SERVICES

| | | |
|------|--------------------------------------|-----|
| 5.1. | Introduction | 232 |
| 5.2. | Variable bit rate video coding | 232 |
| 5.3. | Statistical multiplexing | 237 |

| | | |
|------|-------------------------------|-----|
| 5.4. | Service multiplexing | 240 |
| 5.5. | Cell loss protection | 244 |
| 5.6. | Service synchronization | 245 |
| 5.7. | Bibliography | 247 |

CHAPTER 6. ATM LAN, HIGH SPEED LOCAL AND METROPOLITAN AREA NETWORKS

| | | |
|--------|---------------------------------------|-----|
| 6.1. | Introduction | 252 |
| 6.2. | ATM LAN | 253 |
| 6.2.1. | Physical layer | 256 |
| 6.2.2. | AAL and signalling | 256 |
| 6.2.3. | Network management | 258 |
| 6.2.4. | Quality of service parameters | 259 |
| 6.3. | Definition of a MAN | 261 |
| 6.4. | MAN relation with BISDN and ATM | 264 |
| 6.5. | FDDI | 265 |
| 6.5.1. | Layered structure | 269 |
| 6.5.2. | FDDI-II | 271 |
| 6.5.3. | Performance of FDDI | 273 |
| 6.6. | DQDB | 273 |
| 6.6.1. | DQDB topology | 274 |
| 6.6.2. | The DQDB protocol | 279 |
| 6.6.3. | Performance of DQDB | 282 |
| 6.7. | Orwell | 282 |
| 6.7.1. | Orwell description | 284 |
| 6.7.2. | Slot structure | 285 |
| 6.7.3. | Performance of Orwell | 286 |
| 6.8. | Bibliography | |

CHAPTER 7. TRAFFIC CONTROL IN ATM NETWORKS

| | | |
|----------|--|-----|
| 7.1. | Introduction | 289 |
| 7.2. | Basic ATM traffic control functions | 289 |
| 7.2.1. | Connection admission control | 290 |
| 7.2.2. | Usage / network parameter control | 290 |
| 7.3. | Traffic parameter specification | 291 |
| 7.3.1. | Definitions | 291 |
| 7.3.2. | Characteristics of traffic parameters | 291 |
| 7.3.3. | Statistical versus operational traffic specification | 292 |
| 7.3.4. | Generic cell rate algorithm | 294 |
| 7.4. | Traffic contract specification | 294 |
| 7.4.1. | Connection traffic descriptor | 294 |
| 7.4.1.1. | Peak cell rate | |

| | | |
|----------|---|-----|
| 7.4.1.2. | Cell delay variation tolerance | 295 |
| 7.4.1.3. | Sustainable cell rate | 295 |
| 7.4.1.4. | Burst tolerance | 296 |
| 7.4.2. | Requested quality of service class | 297 |
| 7.4.3. | Definition of a compliant connection | 297 |
| 7.5. | Granularity of traffic contract parameters | 297 |
| 7.6. | Bounds on cell delay variation and burst tolerances | 298 |
| 7.6.1. | The simulation model | 298 |
| 7.6.2. | The reference model | 300 |
| 7.6.3. | Some key results | 300 |
| 7.6.4. | Bounds for CDV tolerance | 302 |
| 7.7. | UPC/NPC performance meters | 303 |
| 7.7.1. | UPC location | 303 |
| 7.7.2. | UPC/NPC actions | 304 |
| 7.7.3. | UPC performance metrics | 304 |
| 7.8. | Additional control functions | 305 |
| 7.8.1. | Priority control | 305 |
| 7.8.2. | Traffic shaping | 306 |
| 7.8.3. | Network resource management | 306 |
| 7.9. | Bibliography | 307 |

CHAPTER 8. INTRODUCTION STRATEGIES FOR ATM

| | | |
|----------|--|-----|
| 8.1. | Introduction | 309 |
| 8.2. | ATM in the private network | 310 |
| 8.2.1. | The evolution of intelligent hubs | 310 |
| 8.2.2. | Initial application of ATM hubs | 311 |
| 8.2.3. | The use of ATM LANs | 312 |
| 8.3. | ATM in the access network | 313 |
| 8.3.1. | FITL with PON technology | 315 |
| 8.3.2. | High capacity point-to-multipoint transport system | 315 |
| 8.3.2.1. | Transport system | 316 |
| 8.3.2.2. | Enabling techniques | 317 |
| 8.3.3. | Modular equipment at the subscriber side | 320 |
| 8.3.4. | Expandable interworking unit at the central office | 321 |
| 8.3.5. | Evolution capabilities | 322 |
| 8.4. | ATM in the switching network | 323 |
| 8.5. | Conclusion | 326 |
| 8.6. | Bibliography | 326 |

| | |
|-------------|-----|
| Index | 328 |
