<b>Preface</b>	ix
<b>1   Preliminaries</b>	1
1.1 Introduction	1
1.2 Using <i>Mathematica</i>	4
1.2.1 Getting Into and Out of <i>Mathematica</i>	4
1.2.2 Getting Help	5
1.2.3 The Syntax of Inputs	6
1.2.4 Errors	10
1.3 The <i>Mathematica</i> Language	12
1.3.1 Internal Forms of Expressions	12
1.3.2 Predicates and Boolean Operations	14
1.3.3 Evaluation of Expressions	16
1.3.4 Attributes	19
1.4 The <i>Mathematica</i> Interface	21
1.4.1 The Notebook Front End	21
1.4.2 The Command Line Interface	26
<b>2   A Brief Overview of <i>Mathematica</i></b>	29
2.1 Numerical and Symbolic Computations	29
2.2 Functions	34
2.2.1 Functions of Number Theory	35
2.2.2 Functions of Linear Algebra	37
2.2.3 Random Number Generators	40

2.3.1 Two-Dimensional Plots	44
2.3.2 Parametric Plots	45
2.3.3 Three-Dimensional Plots	47
2.4 Representation of Data	51
2.5 Programming	53
2.5.1 Example—Harmonic Numbers	53
2.5.2 Example—Perfect Numbers	56
<b>3   List Manipulation</b>	59
3.1 Introduction	59
3.2 Creating and Measuring Lists	60
3.2.1 List Construction	60
3.2.2 Dimensions of Lists	63
3.3 Working With the Elements of a List	65
3.3.1 Positions in a List	65
3.3.2 Extracting Elements and Rearranging Lists	66
3.4 Working with Several Lists	73
3.5 Higher-Order Functions	74
3.6 Applying Functions to Lists Repeatedly	79
3.7 Strings and Characters	82
<b>4   Functions</b>	87
4.1 Introduction	87
4.2 Programs as Functions	87
4.2.1 Nesting Function Calls	87
4.2.2 Value Names	93
4.3 User-Defined Functions	96
4.4 Auxiliary Functions	102
4.4.1 Compound Functions	102
4.4.2 Localizing Names	104
4.5 Anonymous Functions	109
4.6 One-Liners	114
4.6.1 The Josephus Problem	115
4.6.2 Pocket Change	116
<b>5   Evaluation of Expressions</b>	123
5.1 Introduction	123
5.2 Creating Rewrite Rules	123

5.4 Patterns	132
5.4.1 Blanks	133
5.4.2 Expression Pattern-Matching	133
5.4.3 Sequence Pattern-Matching	135
5.4.4 Conditional Pattern-Matching	137
5.4.5 Alternatives	138
5.5 Term Rewriting	141
5.6 Transformation Rules	146
<b>6   Conditional Function Definitions</b>	153
6.1 Introduction	153
6.2 Conditional Functions	156
6.3 Example—Classifying Points	160
<b>7   Recursion</b>	169
7.1 Fibonacci Numbers	169
7.2 List Functions	172
7.3 Thinking Recursively	176
7.4 Recursion and Symbolic Computations	184
7.5 Gaussian Elimination	190
7.6 Trees	198
7.6.1 Binary Trees	198
7.6.2 Huffman Encoding	200
7.7 Dynamic Programming	211
7.8 Higher-Order Functions and Recursion	215
7.9 Debugging	219
7.9.1 Tracing Evaluation	219
7.9.2 Printing Variables	220
7.9.3 Common Errors	221
<b>8   Iteration</b>	225
8.1 Newton's Method	225
8.1.1 Do Loops	226
8.1.2 While Loops	229
8.2 Vectors and Matrices	237
8.2.1 List Component Assignment	238
8.2.2 Finding prime numbers	240
8.3 Passing Arrays to Functions	245
8.4 Gaussian Elimination Revisited	247

9.1	Types of Numbers	255
9.1.1	Integers and Rationals	255
9.1.2	Real Numbers	257
9.1.3	Complex Numbers	261
9.1.4	Computing with Different Number Types	262
9.1.5	Digits and Number Bases	265
9.2	Random Numbers	272
9.3	Precision and Accuracy	279
9.3.1	Roundoff Errors	282
9.4	Numerical Computations	286
9.4.1	Newton's Method Revisited	286
9.4.2	Gaussian Elimination Revisited Again	288
<b>10</b>	<b>Graphics Programming</b>	299
10.1	Graphics Primitives	299
10.1.1	Two-Dimensional Graphics Primitives	299
10.1.2	Three-Dimensional Graphics Primitives	306
10.2	Graphics Directives and Options	313
10.3	Built-In Graphics Functions	318
10.3.1	The Structure of Built-In Graphics	319
10.3.2	Graphics Anomalies	321
10.3.3	Options for Built-In Graphics Functions	325
10.4	Graphics Programming	334
10.4.1	Simple Closed Paths	334
10.4.2	Drawing Trees	340
10.5	Sound	354
10.5.1	The Sound of Mathematics	354
10.5.2	White Music, Brownian Music, and Fractal Noise	358
<b>11</b>	<b>Applications</b>	369
11.1	The Random Walk	369
11.1.1	Introduction	369
11.1.2	The One-Dimensional Random Walk	369
11.1.3	The Two-Dimensional Lattice Walk	371
11.1.4	Visualizing The Two-Dimensional Lattice Walk	371
11.1.5	Numerical Analysis Of The Two-Dimensional Lattice Walk	374
11.2	The Game of Life	380
11.3	Implementing Languages	388

12.2	Using Packages	407
12.2.1	Loading Packages	408
12.2.2	Finding Out What's in a Package	408
12.3	Contexts	409
12.4	Packages	414
12.5	Avoiding Name Collisions	416
12.6	The BaseConvert Package	416
12.7	The RandomWalks Package	419
12.7.1	Adding Options and Defaults	419
12.7.2	The RandomWalks Package	422
	<b>References</b>	431
	<b>Index</b>	435
