

Contents

Preface	ix
Chapter 1. Introduction	1
1.1 History	1
1.2 Layering	3
1.3 OSI Model	3
1.4 Processes	4
1.5 A Simplified Model	4
1.6 Client-Server Model	5
1.7 Plan of the Book	6
1.8 A History of Unix Networking	8
Chapter 2. The Unix Model	10
2.1 Introduction	10
2.2 Basic Definitions	10
2.3 Input and Output	38
2.4 Signals	43
2.5 Process Control	54
2.6 Daemon Processes	72
2.7 Summary	85
Chapter 3. Interprocess Communication	87
3.1 Introduction	87
3.2 File and Record Locking	88
3.3 A Simple Client-Server Example	101
3.4 Pipes	102
3.5 FIFOs	110
3.6 Streams and Messages	115
3.7 Name Spaces	119
3.8 System V IPC	121
3.9 Message Queues	126
3.10 Semaphores	137
3.11 Shared Memory	153
3.12 Sockets and TLI	169
3.13 Summary	170

Chapter 4. A Network Primer	171
Chapter 5. Communication Protocols	197
5.1 Introduction	197
5.2 TCP/IP—the Internet Protocols	198
5.3 XNS—Xerox Network Systems	214
5.4 SNA—Systems Network Architecture	224
5.5 NetBIOS	238
5.6 OSI Protocols	245
5.7 UUCP—Unix-to-Unix Copy	252
5.8 Protocol Comparisons	254
5.9 Summary	257
Chapter 6. Berkeley Sockets	258
6.1 Introduction	258
6.2 Overview	261
6.3 Unix Domain Protocols	262
6.4 Socket Addresses	264
6.5 Elementary Socket System Calls	267
6.6 A Simple Example	278
6.7 Advanced Socket System Calls	298
6.8 Reserved Ports	303
6.9 Stream Pipes	304
6.10 Passing File Descriptors	306
6.11 Socket Options	312
6.12 Asynchronous I/O	326
6.13 Input/Output Multiplexing	328
6.14 Out-of-Band Data	332
6.15 Sockets and Signals	333
6.16 Internet Superserver	334
6.17 Socket Implementation	339
6.18 Summary	340
Chapter 7. System V Transport Layer Interface	342
7.1 Introduction	342
7.2 Overview	343
7.3 Transport Endpoint Addresses	345
7.4 Elementary TLI Functions	345
7.5 A Simple Example	360
7.6 Advanced TLI Functions	370
7.7 Streams	374
7.8 TLI Implementation	379
7.9 Stream Pipes	381

7.10 Passing File Descriptors	386
7.11 Input/Output Multiplexing	388
7.12 Asynchronous I/O	389
7.13 Out-of-Band Data	390
7.14 Summary	391
Chapter 8. Library Routines	392
8.1 Introduction	392
8.2 Berkeley Network Library Routines	392
8.3 Network Utility Routines	397
8.4 Providing a Reliable Message Service	405
8.5 Summary	419
Chapter 9. Security	420
9.1 Introduction	420
9.2 4.3BSD Routines	421
9.3 Kerberos	430
9.4 Summary	436
Chapter 10. Time and Date Routines	437
10.1 Introduction	437
10.2 Internet Time and Date Client	437
10.3 Network Time Synchronization	443
10.4 Summary	443
Chapter 11. Ping Routines	445
11.1 Introduction	445
11.2 Internet Ping Client	445
11.3 XNS Echo Client	460
11.4 Summary	464
Chapter 12. Trivial File Transfer Protocol	465
12.1 Introduction	465
12.2 Protocol	465
12.3 Security	471
12.4 Data Formats	471
12.5 Connections	472
12.6 Client User Interface	473
12.7 UDP Implementation	474
12.8 TCP Implementation	520
12.9 Summary	525

Chapter 13.	Line Printer Spoolers	527
13.1	Introduction	527
13.2	4.3BSD Print Spooler	527
13.3	4.3BSD <code>lpr</code> Client	543
13.4	System V Print Spooler	554
13.5	Summary	561
Chapter 14.	Remote Command Execution	563
14.1	Introduction	563
14.2	Security Issues	564
14.3	<code>rcond</code> Function and <code>rshd</code> Server	565
14.4	<code>rexec</code> Function and <code>rexecd</code> Server	587
14.5	Summary	587
Chapter 15.	Remote Login	589
15.1	Introduction	589
15.2	Terminal Line Disciplines	590
15.3	A Simple Example	591
15.4	Pseudo-Terminals	600
15.5	Terminal Modes	606
15.6	Control Terminals (Again)	613
15.7	<code>rlogin</code> Overview	616
15.8	Windowing Environments	617
15.9	Flow Control	621
15.10	Pseudo-Terminal Packet Mode	622
15.11	<code>rlogin</code> Client	625
15.12	<code>rlogin</code> Server	646
15.13	Summary	665
Chapter 16.	Remote Tape Drive Access	668
16.1	Introduction	668
16.2	Unix Tape Drive Handling	668
16.3	<code>rmt</code> Protocol	669
16.4	<code>rmt</code> Server	671
16.5	Summary	679
Chapter 17.	Performance	680
17.1	Introduction	680
17.2	IPC Performance	680
17.3	Tape Performance	684
17.4	Disk Performance	686
17.5	Network Performance	687
17.6	Summary	690

Chapter 18.	Remote Procedure Calls	692
18.1	Introduction	692
18.2	Transparency Issues	694
18.3	Sun RPC	700
18.4	Xerox Courier	709
18.5	Apollo RPC	716
18.6	Summary	719
Appendix A.	Miscellaneous Source Code	720
A.1	System Type Header File	720
A.2	System Type Shell Script	722
A.3	Standard Error Routines	722
A.4	Timer Routines	731
Bibliography		735
Index		748
