Library of Congress Cataloging-in-Publication Data:
Principles of powder technology / edited by M. J. Rhodes.
p. cm.
Includes bibliographical references.
ISBN 0 471 92422 9 —
1. Powders. I. Rhodes, M. J.
TP156.P3P75 1990 89-70570
620'.43—dc20 CIP

British Library Cataloguing in Publication Data:
Principles of powder technology.
1. Industries. Use of powders
I. Rhodes, M. J.
620'.43

ISBN 0 471 92422 9

Typeset by Photo-graphics, Honiton, Devon
Printed in Great Britain by Antony Rowe Ltd, Chippenham, Wilts

Contents

List of Contributors	ix
Preface	xi
Chapter 1 Powder Processing—The Overall View	1
<i>D. Geldart</i>	
1.1 Introduction	1
1.2 Academic and industrial research needs	2
Bibliography	7
Chapter 2 Characterizing the Single Particle	9
<i>A. E. Hawkins</i>	
2.1 Introduction	9
2.2 Particle density	11
2.3 The microscope	12
2.4 Sampling	15
2.5 Size measurement	18
2.6 Particle shape	21
2.7 Worked examples	27
2.8 Problems	30
References	31
Chapter 3 Characterization of Powders	35
<i>L. Svarovsky</i>	
3.1 Introduction	35
3.2 Sampling	37
3.3 Particle size measurement	40
3.4 Distributions of other particle properties	62
3.5 Problems with answers	66
Notation	67
References	68
Chapter 4 Mixing and Segregation in Powders	71
<i>J. C. Williams</i>	
4.1 Introduction	71
4.2 The statistics of solids mixing	72
4.3 The segregation of particulate materials	76

4.4 The selection of mixers	79
4.5 The specification of mixer performance	83
4.6 The mixing of cohesive particulate materials	83
4.7 Conclusions	86
4.8 Worked examples	87
Notation	89
Acknowledgment	89
References	90
Chapter 5 The Storage and Flow of Powders	91
<i>J. C. Williams</i>	
5.1 Introduction	91
5.2 Types of storage hoppers	92
5.3 Disadvantages of core flow hoppers	93
5.4 Advantages of mass flow hoppers	98
5.5 Disadvantages of mass flow hoppers	99
5.6 Characterizing the flowability of particulate materials	99
5.7 The analogy between hopper design and soil mechanics	106
5.8 The prediction of stresses inside the hopper	107
5.9 The third stage of the hopper design procedure	108
5.10 Flow factor charts	109
5.11 Other types of mass flow hopper	113
5.12 Time consolidation	115
5.13 Filling and emptying hoppers	116
5.14 Problems	117
Bibliography	118
Chapter 6 Gas Fluidization	119
<i>D. Geldart</i>	
6.1 Introduction	119
6.2 Particle and powder properties	121
6.3 Minimum fluidization velocity and bed pressure drop	124
6.4 Slugging fluidized beds and bubble rise velocities	125
6.5 Bed expansion	127
6.6 Entrainment from fluidized beds	127
6.7 Heat transfer	129
6.8 Fluid bed chemical reactors	130
6.9 Applications	132
6.10 Worked example: design of a fluidized bed heater	136
Notation	140
References	142
Chapter 7 Pneumatic Conveying	143
<i>M. J. Rhodes</i>	
7.1 Introduction	143
7.2 Dilute-phase and dense-phase transport	143
7.3 Dilute-phase conveying	144
7.4 Dense-phase conveying	155
7.5 Matching the system to the powder	162

7.6 Worked example: design of dilute-phase system	162
7.7 Problems	167
Notation	168
References	169
Chapter 8 Solid-Gas Separation	171
<i>L. Svarovsky</i>	
8.1 Introduction and principles	171
8.2 General characteristics of gas cleaners	172
8.3 Aero-mechanical dry separators	175
8.4 Aero-mechanical wet separators (scrubbers)	181
8.5 Electrostatic precipitators	184
8.6 Filters	188
8.7 Problems with answers	190
Notation	191
References	192
Chapter 9 Size Enlargement	193
<i>N. G. Stanley-Wood</i>	
9.1 Introduction	193
9.2 Particle-particle bonding	196
9.3 Bonding by mechanical force	203
9.4 Size enlargement (methods and equipment)	207
References	225
Chapter 10 Size Reduction	227
<i>M. H. Prior, H. Prem and M. J. Rhodes</i>	
10.1 Introduction	227
10.2 Particle failure and product behaviour	229
10.3 Models predicting energy requirements for size reduction processes	234
10.4 Prediction of the product size distribution	235
10.5 Material properties and selection criteria for the size reduction process	237
10.6 Stressing mechanisms	242
10.7 Crushers and roll mills	243
10.8 Impact, jet and classifier mills	249
10.9 Ball, rod and related mills	269
10.10 Miscellaneous size reduction machines	275
10.11 Wet size reduction	276
10.12 Industrial comminution systems	279
10.13 Wear and wear protection	290
10.14 Summary	293
10.15 Worked example	293
10.16 Problems	295
References	296
Chapter 11 Explosion and Fire Hazards of Powders	299
<i>K. N. Palmer</i>	
11.1 Introduction	299
11.2 Characteristics of dust explosions	300

11.3 Explosibility tests and their application	303
11.4 Sources of ignition and their avoidance	312
11.5 Fires in powders	316
11.6 Explosion protection	320
11.7 Application to industrial processes	327
11.8 Worked examples	330
References	333
Chapter 12 Health Risks of Fine Powders	335
<i>E. King</i>	
12.1 Introduction	335
12.2 Size of airborne dust	336
12.3 Dust and the respiratory tree	339
12.4 Other routes into the body	340
12.5 Nature of risk to health	342
12.6 Exposure related risk to health	346
12.7 Air sampling techniques	348
12.8 Air standards	350
12.9 The control of risk to health	356
12.10 Personal protective equipment (PPE)	361
12.11 Use of controls	363
12.12 Examples of dust control	364
Appendix	365
Glossary and acronyms	366
References	367
Chapter 13 Flow of Liquid-Solid Suspensions	367
<i>H. Benkreira</i>	
13.1 Introduction	367
13.2 Settling of suspensions	368
13.3 Homogeneous suspensions	370
13.4 Heterogeneous suspensions	387
13.5 Conclusions	391
Notation	391
References	393
Chapter 14 Solid-Liquid Separation	395
<i>L. Svarovsky</i>	
14.1 Introduction	395
14.2 Pre-treatment of suspensions	401
14.3 Equipment and principles	404
14.4 Sizing and scale-up of equipment	419
Notation	427
References	427
Index	429
