# CONTENTS

Preface	xv
List of Recurrent Symbols	xix
<b>CHAPTER 1 Introduction to Manufacturing</b>	<b>1</b>
1-1 Historical Developments	1
Early Developments	
The First Industrial Revolution	
The Second Industrial Revolution	
1-2 The Economic Role of Manufacturing	5
1-3 Manufacturing as a Technical Activity	7
1-4 Manufacturing	12
The Manufacturing System	
Impediments to Systems Approach	
Computers in Manufacturing	
Control of Manufacturing Processes	
1-5 Scope and Purpose of Book	26
1-6 Summary	28
Further Reading	29
<b>CHAPTER 2 Attributes of Manufactured Products</b>	<b>35</b>
2-1 Mechanical Properties	36
Tension	
Compression	
Bending	

	Hardness	
	Impact and Fracture Toughness	
	Fatigue	
	High-Temperature Properties	
	Residual Stresses	
2-2	Physical Properties	61
	Tribological Properties	
	Electronic Properties	
	Magnetic Properties	
	Thermal Properties	
	Optical Properties	
2-3	Chemical Properties	66
2-4	Geometric Attributes	66
	Shape	
	Group Technology	
	Dimensional Tolerances	
	Shape and Location Deviations	
	Surface Roughness and Waviness	
	Engineering Metrology	
2-5	Nondestructive Testing (NDT)	87
2-6	Materials Selection	88
2-7	Summary	91
	Problems	93
	Further Reading	94

### CHAPTER 3 Metal Casting 99

3-1	Solidification of Metals	99
	Pure Metals	
	Solid Solutions	
	Eutectic Systems	
	Other Systems	
	Solid-State Reactions	
	The Iron-Iron Carbide System	
3-2	Structure-Property Relationships	112
	Metals and Single-Phase Alloys	
	Two-Phase Materials	
	Ternary and Polycomponent Alloys	
	Inclusions	
	Effects of Grain Size	
3-3	Structure and Properties of Castings	119
	Nucleation and Growth of Grains	
	Solidification of Melts	
	Nonequilibrium Solidification	
	Gases	
3-4	Casting Properties	129
	Viscosity	
	Surface Effects	
	Fluidity	
3-5	Changing Properties After Casting	133
	Application of Pressure	

	Annealing	
	Precipitation Hardening	
	Heat Treatment of Steel	
	Surface Treatment of Steel	
3-6	Casting Alloys	139
	Ferrous Materials	
	Nonferrous Materials	
3-7	Melting and Pouring	147
	Melting	
	Pouring	
	Quality Assurance	
3-8	Casting Processes	151
	Ingot Casting	
	Casting of Shapes	
	Expendable-Mold, Permanent-Pattern Casting	
	Expendable-Mold, Expendable-Pattern Casting	
	Permanent-Mold Casting	
	Centrifugal Casting	
3-9	Finishing Processes	174
	Cleaning and Finishing	
	Quality Assurance	
	Inspection	
3-10	Design for Casting	176
3-11	Summary	178
	Problems	179
	Further Reading	181

### CHAPTER 4 Bulk Deformation Processes 183

4-1	Material Properties	184
	Flow Stress in Cold Working	
	Effects of Cold Working	
	Annealing	
	Hot Working	
	Interactions between Deformation and Structure	
4-4	Wrought Alloys	200
	Carbon Steels	
	Alloy Steels	
	Nonferrous Metals	
4-3	Principles of Deformation Processing	207
	Classification	
	Pressures and Forces	
	Bulk Workability	
4-4	Forging	221
	Upsetting of a Cylinder	
	Forging of Rectangular Workpieces	
	Open-Die Forging	
	Impression-Die Forging	
	Closed-Die Forging	
	Forge Rolling and Rotary Swaging	
	Process Limitations	

4-5	Extrusion	246
	The Extrusion Process	
	Hot Extrusion	
	Cold Extrusion	
	Hydrostatic Extrusion	
	Extrusion Forces	
	Process Limitations	
4-6	Forging and Extrusion Equipment	254
	Tools and Dies	
	Hammers	
	Presses	
4-7	Drawing	262
	The Drawing Process	
	Forces	
	Process Limitations	
4-8	Rolling	266
	Flat Rolling	
	Shape Rolling	
	Ring Rolling	
	Transverse Rolling	
	Calculation of Forces and Power Requirements	
	Process Limitations	
4-9	Summary	274
	Problems	274
	Further Reading	277

<b>CHAPTER 5</b>	<b>Sheet-Metalworking Processes</b>	<b>280</b>
5-1	Material Properties	280
	Formability	
	Yield-Point Phenomena	
	Textures (Anisotropy)	
	Metals	
5-2	Shearing	289
	The Shearing Process	
	Forces	
	Finish Blanking and Punching	
	Processes and Equipment	
5-3	Bending	296
	Limitations	
	Stresses and Springback	
	Bending Methods	
	Flanging and Necking	
5-4	Special Processes	306
	Spinning	
	Bulging	
	Peen Forming	
5-5	Sheet Forming	307
	Stretch Forming	
	Deep Drawing	
	Combined Stretching-Drawing	

	Press Forming	
	Special Operations	
5-6	Sheet-Metalworking Dies and Equipment	325
5-7	Summary	325
	Problems	327
	Further Reading	328

<b>CHAPTER 6</b>	<b>Processing of Particulate Metals and Ceramics and of Glasses</b>	<b>330</b>
6-1	Processing Steps for Particulates	330
	Preparation of Powder	
	Consolidation	
	Sintering	
	Hot Compaction	
6-2	Powder-Metallurgy Products	343
	The Powder	
	Consolidation of Metal Powders	
	Sintering and Finishing	
	Applications	
6-3	Ceramics	349
	Bonding and Structure	
	Properties of Ceramics	
	Preparation of Powders	
	Consolidation of Ceramic Powders	
	Sintering and Finishing	
	Applications	
6-4	Process Limitations and Design Aspects	363
6-5	Glasses	364
	Structure and Properties of Glasses	
	Manufacturing Processes	
	Coatings	
6-6	Electroforming	374
6-7	Summary	376
	Problems	377
	Further Reading	378

<b>CHAPTER 7</b>	<b>Processing of Polymers</b>	<b>380</b>
7-1	Polymerization Reactions	381
7-2	Linear Polymers	383
	Structure of Linear Polymers	
	Sources of Strength	
	Crystalline and Amorphous Polymers	
	Rheology of Linear Polymers	
7-3	Cross-linked Polymers	393
	Elastomers	
	Thermosetting Polymers	
7-4	Additives and Fillers	397
	Additives	
	Fillers	

7-5 Service Properties of Polymers	399
Mechanical Properties	
Physical and Chemical Properties	
7-6 Polymeric Materials	403
Thermoplastic Polymers	
Elastomers	
Thermosetting Polymers	
7-7 Processing of Polymers	410
Casting Processes	
Principles of Melt Processing	
Melt Processing Techniques	
Processing in the Rubbery State	
Cellular or Foam Plastics	
7-8 Plastics-Processing Equipment	426
7-9 Design with Plastics	426
7-10 Composites	429
Types of Composites	
Reinforcing Fibers	
Fabrication Methods	
7-11 Summary	436
Problems	437
Further Reading	438
<b>CHAPTER 8 Machining</b>	441
8-1 The Metal-Cutting Process	442
Ideal Orthogonal Cutting	
Forces in Cutting	
Realistic Orthogonal Cutting	
Oblique Cutting	
Forces and Energy Requirements	
Temperatures and Their Control	
Tool Life	
Surface Quality	
8-2 Work Material	466
Machinability	
Machinable Materials	
Ferrous Materials	
Nonferrous Materials	
8-3 Cutting Tools	472
Tool Materials	
Tool Construction	
8-4 Methods of Machining a Shape	479
Forming	
Generating	
8-5 Single-Point Machining	481
The Tool	
Turning	
Boring	
Facing	
Forming	
Automatic Lathe	
Turret Lathe	

Automatic Screw Machines	
Shaping and Planing	
8-6 Multipoint Machining	492
Drilling	
Milling	
Sawing and Filing	
Broaching and Thread Cutting	
Gear Production	
8-7 Choice of Process Variables	503
Cutting Speeds and Feeds	
Cutting Time and Power	
Choice of Machine Tool	
Optimization of the Cutting Process	
8-8 Abrasive Machining	514
The Process of Abrasive Machining	
Abrasives	
Grinding	
Other Abrasive Processes	
8-9 Chemical and Electrical Machining	524
Chemical Machining (CM or CHM)	
Electrochemical Machining (ECM)	
Electrical Discharge Machining (EDM)	
High-Energy Beam Machining	
8-10 Machining of Polymers and Ceramics	529
Machining of Plastics	
Machining of Ceramics	
8-11 Process Limitations and Design Aspects	530
8-12 Summary	531
Problems	532
Further Reading	535
<b>CHAPTER 9 Joining Processes</b>	538
9-1 Mechanical Joining	538
9-2 Solid-State Bonding	540
Cold Welding	
Diffusion Bonding	
Forge Welding	
Friction Welding (FRW)	
9-3 Liquid-State Welding	545
The Welded Joint	
Weldability and Weld Quality	
Weldable Materials	
Resistance Welding	
Electric Arc Welding	
Thermal Welding	
High-Energy Beam Welding	
9-4 Liquid-Solid-State Bonding	566
Brazing	
Soldering	
9-5 Surface Coatings	570
9-6 Cutting	571

9-7 Adhesive Bonding	573
Characteristics of Structural Adhesives	
Adhesive Types and Their Applications	
9-8 Joining of Plastics	577
9-9 Design Aspects	578
9-10 Summary	580
Problems	581
Further Reading	582
<b>CHAPTER 10 Manufacture of Semiconductor Devices</b>	584
10-1 Elements of Semiconductor Devices	585
The Semiconductor	
Semiconductor Devices	
10-2 Manufacture of Silicon Wafers	594
Production of EGS	
Crystal Growing	
Wafer Preparation	
10-3 Device Fabrication	597
Outline of Process Sequence	
Basic Fabrication Techniques	
Changing the Composition of the Surface	
Deposition of Surface Films	
Lithography	
Etching	
Process Integration	
Packaging	
10-4 Thick-Film and Thin-Film Technologies	618
Thin-Film Fabrication Methods	
Thick-Film Circuits	
10-5 Summary	620
Further Reading	621
<b>CHAPTER 11 Manufacturing Systems</b>	623
11-1 Material Movement	623
Attended Material Movement	
Mechanized Material Movement	
Robots	
11-2 Production Organization	629
Production Characteristics	
Optimum Manufacturing Method	
Organization for Mass Production	
Organization for Batch Production	
Organization of Assembly	
Scheduling of Assembly	
11-3 Quality Assurance	640
Statistical Aspects of Manufacturing	
Acceptance Control	
Statistical Process Control	
11-4 Manufacturing Management	649
Company Organization	
Manufacturing Engineering	

11-5 Summary	651
Further Reading	652
<b>CHAPTER 12 Competitive Aspects of Manufacturing Processes</b>	656
12-1 Manufacturing Costs	656
Cost and Productivity	
Operating Costs (Direct Costs)	
Indirect Costs	
Fixed Costs	
12-2 Competition Between Manufacturing Processes	661
Shape Limitations	
Size Limitations	
Surface Finish and Tolerances	
12-3 Competition Between Materials	673
12-4 Identifying the Optimum Approach	674
12-5 Summary	677
Problems	678
Further Reading	679
<b>Appendix A</b>	680
<b>Appendix B</b>	683
<b>Appendix C</b>	684
<b>Solutions to Selected Problems</b>	685
<b>Index</b>	689
