

## CONTENTS

Preface . . . . .	v
Notation . . . . .	xiii
Introduction . . . . .	1
<b>Chapter 1. Bending of Long Rectangular Plates to a Cylindrical Surface . . . . .</b>	<b>4</b>
1. Differential Equation for Cylindrical Bending of Plates . . . . .	4
2. Cylindrical Bending of Uniformly Loaded Rectangular Plates with Simply Supported Edges . . . . .	6
3. Cylindrical Bending of Uniformly Loaded Rectangular Plates with Built-in Edges . . . . .	13
4. Cylindrical Bending of Uniformly Loaded Rectangular Plates with Elastically Built-in Edges . . . . .	17
5. The Effect on Stresses and Deflections of Small Displacements of Longitudinal Edges in the Plane of the Plate . . . . .	20
6. An Approximate Method of Calculating the Parameter $u$ . . . . .	24
7. Long Uniformly Loaded Rectangular Plates Having a Small Initial Cylindrical Curvature . . . . .	27
8. Cylindrical Bending of a Plate on an Elastic Foundation . . . . .	30
<b>Chapter 2. Pure Bending of Plates . . . . .</b>	<b>33</b>
9. Slope and Curvature of Slightly Bent Plates . . . . .	33
10. Relations between Bending Moments and Curvature in Pure Bending of Plates . . . . .	37
11. Particular Cases of Pure Bending . . . . .	42
12. Strain Energy in Pure Bending of Plates . . . . .	46
13. Limitations on the Application of the Derived Formulas . . . . .	47
14. Thermal Stresses in Plates with Clamped Edges . . . . .	49
<b>Chapter 3. Symmetrical Bending of Circular Plates . . . . .</b>	<b>51</b>
15. Differential Equation for Symmetrical Bending of Laterally Loaded Circular Plates . . . . .	51
16. Uniformly Loaded Circular Plates . . . . .	54
17. Circular Plate with a Circular Hole at the Center . . . . .	58
18. Circular Plate Concentrically Loaded . . . . .	63
19. Circular Plate Loaded at the Center . . . . .	67
20. Corrections to the Elementary Theory of Symmetrical Bending of Circular Plates . . . . .	72
<b>Chapter 4. Small Deflections of Laterally Loaded Plates . . . . .</b>	<b>79</b>
21. The Differential Equation of the Deflection Surface . . . . .	79

22. Boundary Conditions . . . . .	83
23. Alternate Method of Derivation of the Boundary Conditions . . . . .	88
24. Reduction of the Problem of Bending of a Plate to That of Deflection of a Membrane . . . . .	92
25. Effect of Elastic Constants on the Magnitude of Bending Moments . . . . .	97
26. Exact Theory of Plates . . . . .	98
<b>Chapter 5. Simply Supported Rectangular Plates . . . . .</b>	<b>105</b>
27. Simply Supported Rectangular Plates under Sinusoidal Load . . . . .	105
28. Navier Solution for Simply Supported Rectangular Plates . . . . .	108
29. Further Applications of the Navier Solution . . . . .	111
30. Alternate Solution for Simply Supported and Uniformly Loaded Rectangular Plates . . . . .	113
31. Simply Supported Rectangular Plates under Hydrostatic Pressure . . . . .	124
32. Simply Supported Rectangular Plate under a Load in the Form of a Triangular Prism . . . . .	130
33. Partially Loaded Simply Supported Rectangular Plate . . . . .	135
34. Concentrated Load on a Simply Supported Rectangular Plate . . . . .	141
35. Bending Moments in a Simply Supported Rectangular Plate with a Concentrated Load . . . . .	143
36. Rectangular Plates of Infinite Length with Simply Supported Edges . . . . .	149
37. Bending Moments in Simply Supported Rectangular Plates under a Load Uniformly Distributed over the Area of a Rectangle . . . . .	158
38. Thermal Stresses in Simply Supported Rectangular Plates . . . . .	162
39. The Effect of Transverse Shear Deformation on the Bending of Thin Plates . . . . .	165
40. Rectangular Plates of Variable Thickness . . . . .	173
<b>Chapter 6. Rectangular Plates with Various Edge Conditions . . . . .</b>	<b>180</b>
41. Bending of Rectangular Plates by Moments Distributed along the Edges . . . . .	180
42. Rectangular Plates with Two Opposite Edges Simply Supported and the Other Two Edges Clamped . . . . .	185
43. Rectangular Plates with Three Edges Simply Supported and One Edge Built In . . . . .	192
44. Rectangular Plates with All Edges Built In . . . . .	197
45. Rectangular Plates with One Edge or Two Adjacent Edges Simply Supported and the Other Edges Built In . . . . .	205
46. Rectangular Plates with Two Opposite Edges Simply Supported, the Third Edge Free, and the Fourth Edge Built In or Simply Supported . . . . .	208
47. Rectangular Plates with Three Edges Built In and the Fourth Edge Free . . . . .	211
48. Rectangular Plates with Two Opposite Edges Simply Supported and the Other Two Edges Free or Supported Elastically . . . . .	214
49. Rectangular Plates Having Four Edges Supported Elastically or Resting on Corner Points with All Edges Free . . . . .	218
50. Semi-infinite Rectangular Plates under Uniform Pressure . . . . .	221
51. Semi-infinite Rectangular Plates under Concentrated Loads . . . . .	225
<b>Chapter 7. Continuous Rectangular Plates . . . . .</b>	<b>229</b>
52. Simply Supported Continuous Plates . . . . .	229
53. Approximate Design of Continuous Plates with Equal Spans . . . . .	236
54. Bending of Plates Supported by Rows of Equidistant Columns (Flat Slabs) . . . . .	245
55. Flat Slab Having Nine Panels and Slab with Two Edges Free . . . . .	253
56. Effect of a Rigid Connection with Column on Moments of the Flat Slab . . . . .	257

<b>Chapter 8. Plates on Elastic Foundation . . . . .</b>	<b>259</b>
57. Bending Symmetrical with Respect to a Center . . . . .	259
58. Application of Bessel Functions to the Problem of the Circular Plate . . . . .	265
59. Rectangular and Continuous Plates on Elastic Foundation . . . . .	269
60. Plate Carrying Rows of Equidistant Columns . . . . .	276
61. Bending of Plates Resting on a Semi-infinite Elastic Solid . . . . .	278
<b>Chapter 9. Plates of Various Shapes . . . . .</b>	<b>282</b>
62. Equations of Bending of Plates in Polar Coordinates . . . . .	282
63. Circular Plates under a Linearly Varying Load . . . . .	285
64. Circular Plates under a Concentrated Load . . . . .	290
65. Circular Plates Supported at Several Points along the Boundary . . . . .	293
66. Plates in the Form of a Sector . . . . .	295
67. Circular Plates of Nonuniform Thickness . . . . .	298
68. Annular Plates with Linearly Varying Thickness . . . . .	303
69. Circular Plates with Linearly Varying Thickness . . . . .	305
70. Nonlinear Problems in Bending of Circular Plates . . . . .	308
71. Elliptical Plates . . . . .	310
72. Triangular Plates . . . . .	313
73. Skewed Plates . . . . .	318
74. Stress Distribution around Holes . . . . .	319
<b>Chapter 10. Special and Approximate Methods in Theory of Plates . . . . .</b>	<b>325</b>
75. Singularities in Bending of Plates . . . . .	325
76. The Use of Influence Surfaces in the Design of Plates . . . . .	328
77. Influence Functions and Characteristic Functions . . . . .	334
78. The Use of Infinite Integrals and Transforms . . . . .	336
79. Complex Variable Method . . . . .	340
80. Application of the Strain Energy Method in Calculating Deflections . . . . .	342
81. Alternative Procedure in Applying the Strain Energy Method . . . . .	347
82. Various Approximate Methods . . . . .	348
83. Application of Finite Differences Equations to the Bending of Simply Supported Plates . . . . .	351
84. Experimental Methods . . . . .	362
<b>Chapter 11. Bending of Anisotropic Plates . . . . .</b>	<b>364</b>
85. Differential Equation of the Bent Plate . . . . .	364
86. Determination of Rigidities in Various Specific Cases . . . . .	366
87. Application of the Theory to the Calculation of Gridworks . . . . .	369
88. Bending of Rectangular Plates . . . . .	371
89. Bending of Circular and Elliptic Plates . . . . .	376
<b>Chapter 12. Bending of Plates under the Combined Action of Lateral Loads and Forces in the Middle Plane of the Plate . . . . .</b>	<b>378</b>
90. Differential Equation of the Deflection Surface . . . . .	378
91. Rectangular Plate with Simply Supported Edges under the Combined Action of Uniform Lateral Load and Uniform Tension . . . . .	380
92. Application of the Energy Method . . . . .	382
93. Simply Supported Rectangular Plates under the Combined Action of Lateral Loads and of Forces in the Middle Plane of the Plate . . . . .	387
94. Circular Plates under Combined Action of Lateral Load and Tension or Compression . . . . .	391
95. Bending of Plates with a Small Initial Curvature . . . . .	393

<b>Chapter 13. Large Deflections of Plates</b> . . . . .	396
96. Bending of Circular Plates by Moments Uniformly Distributed along the Edge . . . . .	396
97. Approximate Formulas for Uniformly Loaded Circular Plates with Large Deflections . . . . .	400
98. Exact Solution for a Uniformly Loaded Circular Plate with a Clamped Edge . . . . .	404
99. A Simply Supported Circular Plate under Uniform Load . . . . .	408
100. Circular Plates Loaded at the Center . . . . .	412
101. General Equations for Large Deflections of Plates . . . . .	415
102. Large Deflections of Uniformly Loaded Rectangular Plates . . . . .	421
103. Large Deflections of Rectangular Plates with Simply Supported Edges . . . . .	425
<b>Chapter 14. Deformation of Shells without Bending</b> . . . . .	429
104. Definitions and Notation . . . . .	429
105. Shells in the Form of a Surface of Revolution and Loaded Symmetrically with Respect to Their Axis . . . . .	433
106. Particular Cases of Shells in the Form of Surfaces of Revolution . . . . .	436
107. Shells of Constant Strength . . . . .	442
108. Displacements in Symmetrically Loaded Shells Having the Form of a Surface of Revolution . . . . .	445
109. Shells in the Form of a Surface of Revolution under Unsymmetrical Loading . . . . .	447
110. Stresses Produced by Wind Pressure . . . . .	449
111. Spherical Shell Supported at Isolated Points . . . . .	453
112. Membrane Theory of Cylindrical Shells . . . . .	457
113. The Use of a Stress Function in Calculating Membrane Forces of Shells . . . . .	461
<b>Chapter 15. General Theory of Cylindrical Shells</b> . . . . .	466
114. A Circular Cylindrical Shell Loaded Symmetrically with Respect to Its Axis . . . . .	466
115. Particular Cases of Symmetrical Deformation of Circular Cylindrical Shells . . . . .	471
116. Pressure Vessels . . . . .	481
117. Cylindrical Tanks with Uniform Wall Thickness . . . . .	485
118. Cylindrical Tanks with Nonuniform Wall Thickness . . . . .	488
119. Thermal Stresses in Cylindrical Shells . . . . .	497
120. Inextensional Deformation of a Circular Cylindrical Shell . . . . .	501
121. General Case of Deformation of a Cylindrical Shell . . . . .	507
122. Cylindrical Shells with Supported Edges . . . . .	514
123. Deflection of a Portion of a Cylindrical Shell . . . . .	516
124. An Approximate Investigation of the Bending of Cylindrical Shells . . . . .	519
125. The Use of a Strain and Stress Function . . . . .	522
126. Stress Analysis of Cylindrical Roof Shells . . . . .	524
<b>Chapter 16. Shells Having the Form of a Surface of Revolution and Loaded Symmetrically with Respect to Their Axis</b> . . . . .	533
127. Equations of Equilibrium . . . . .	533
128. Reduction of the Equations of Equilibrium to Two Differential Equations of the Second Order . . . . .	537
129. Spherical Shell of Constant Thickness . . . . .	540

130. Approximate Methods of Analyzing Stresses in Spherical Shells . . . . .	547
131. Spherical Shells with an Edge Ring . . . . .	555
132. Symmetrical Bending of Shallow Spherical Shells . . . . .	558
133. Conical Shells . . . . .	562
134. General Case of Shells Having the Form of a Surface of Revolution . . . . .	566
Name Index . . . . .	569
Subject Index . . . . .	575
