Contents

Preface ix
Notation xi

1 Introduction **1**
1.1 Early history 1
1.2 Contemporary structures 2
1.3 The future 3
1.4 Purpose of the book 4

2 General principles **6**
2.1 Arching 6
2.2 Elastic stress distribution 15
2.2.1 Stress distribution around a circular cavity 15
2.2.2 Stress distribution around non-circular cavities 20
2.2.3 Two circular cavities in close proximity 25
2.2.4 Thick-cylinder theory 27
2.2.5 Concentrated free surface loads 29
2.2.6 Stress distribution around a spherical cavity 30
2.2.7 Stress distribution above a yielding trapdoor 32
2.3 Properties of soils 35
2.3.1 Static properties of granular soils 36
2.3.2 Static properties of cohesive soils 39
2.3.3 Static properties of rock 41
2.3.4 Dynamic properties of soils 41
2.3.5 Wave propagation in soils 45

3 Thick-walled pipes under static loads **52**
3.1 Ditch-type excavations 53
3.2 Positive projecting conduits 57
3.3 Negative projecting conduits 61
3.4 Wide trenches and multiple pipes 65
3.5 Submerged pipes 67
3.6 Concentrated free surface loads 68

3.7 Other methods of load analysis 71
3.8 Conduit beddings 74
3.9 Full-scale experiments 75
3.10 Model tests 82

4 Thin-walled pipes under static loads 89
4.1 Deflection analysis (traditional methods) 90
4.2 Deflection analysis (recent developments) 97
4.2.1 Closed-form elastic solution 97
4.2.2 Finite element program 100
4.3 Buckling under static loads 104
4.3.1 Elastic analysis 104
4.3.2 Ultimate strength related to flexibility 109
4.3.3 Ultimate strength related to cover depth 110
4.3.4 Experimental studies 114
4.4 Design rules 121
4.4.1 US Corrugated Steel Pipe Institute guidelines 121
4.4.2 US Naval Civil Engineering Laboratory reports 124
4.4.3 CIRIA recommendations 126
4.4.4 UK military design codes 127

5 Non-circular pipes, closed cylinders and shells under static loads 134
5.1 Thin-walled square sections 134
5.2 Elliptic sections 143
5.3 Pipe arches 147
5.4 Arches 152
5.5 Thick-walled arches 156
5.6 Thick-walled closed cylinders 158
5.7 Thin-walled closed cylinders 160
5.8 Vertical capsules 162
5.9 Thin-walled domes 164
5.10 Thin-walled spherical shells 168

6 Structures under dynamic loads 173
6.1 Tests at the University of Illinois, USA 173
6.2 Tests at the US Waterways Experiment Station 176
6.3 Tests at the US Air Force Weapons Laboratory 180
6.4 Tests in the UK 181
6.5 Dynamic analysis 189
6.6 Underground concrete structures under localized explosive loads 193
6.7 Underground concrete structures under surface pressures from nuclear explosions 196

6.8 Structural design of domestic nuclear shelters 198
6.9 Backpacking 200
6.10 Military shelters 202
6.11 Burster slabs 206

7 Loads, strength and safety 213
7.1 Rail and road tunnels 213
7.2 Large water pipelines 214
7.3 Corrugated steel pipes 216
7.4 Underground blast shelters 218
7.5 Conclusions 220
