Preface by H. P. Nachtnebel & K. Kovar

1 GIS Functions and Hydrological Modelling

- An adaptive GIS toolbox for hydrological modelling *O. Batelaan, Zhong-Min Wang & F. De Smedt* 3
- Integration architecture and internal database for coupling a hydrological model and ARC/INFO *Ling Bian, Hao Sun, Clayton F. Blodgett, Stephen L. Egbert, Weiping Li, Limei Ran & Antonis D. Koussis* 11
- ATHYS: a hydrological environment for spatial modelling and coupling with GIS *Christophe Bouvier & Francois Delclaux* 19
- Linking multiple process level models with GIS *Thomas William Charnock, Peter David Hedges & John Elgy* 29
- Coupling GIS and DEM to classify the Hortonian pathways of non-point sources to the hydrographic network *Daniel Cluis, Lawrence Martz, Emmanuelle Quentin & Cécile Rechatin* 37

2 Methodological Aspects

- MEDRUSH – spatial and temporal river-basin modelling at scales commensurate with global environmental change *R. J. Abrahart, M. J. Kirkby, M. L. McMahon, J. C. Bathurst, J. Ewen, C. G. Kilsby, S. M. White, S. Diamond, I. Woodward, J. C. Hawkes, J. Shao & J. B. Thornes* 47
- Breadth first linear quadtrees for water resource management in Geographical Information Systems *Henry Ker-Chang Chang, Lai-Lung Cheng, Shu-Hwang Liao & Cjien-Kang Kuo* 55
- Scale-up of a runoff model using GIS and an object-oriented hydrological modelling system *Michiharu Shiiba, Yutaka Ichikawa, Shichi Ikebuchi, Yusuto Tachikawa & Takuma Takasao* 63
- Integrating dynamic environmental models in GIS: the development of a prototype dynamic simulation language *Willem Van Deursen & Cees Wesseling* 71
- TimeView: a time series management system for GIS and hydrological systems *Ulrich Wolf-Schumann & Stefan Vaillant* 79
- Introduire les SIG dans une école d'ingénieurs pour l'eau et l'environnement *Michel Wurtz* 89

3 Coupling GIS with Hydrological Models

- Coupling GIS with a distributed hydrological model for studying the effect of various urban planning options on rainfall-runoff relationship in urbanized watersheds *Mourad Bellal, Xavier Sillen & Yves Zech* 99

Linking a synthetic storm generation model with the IDRISI GIS <i>Fernanda da Serra Costa, Jorge Machado Damázio, Fernando Pereira das Neves & Maria de Fátima Rodrigues Simabuguro</i>	107
Landscape interfaces and transparency to hydrological functions <i>Thomas Gumbricht</i>	115
Integrating a geographic information system, a scientific visualization system and an orographic precipitation model <i>Lauren Hay & Loey Knapp</i>	123
Linking GIS and hydrological models: where we have been, where we are going? <i>Stephen M. Kopp</i>	133
A distributed hydrological modelling system linking GIS and hydrological models <i>Minjiao Lu, Tosio Koike & Norio Hayakawa</i>	141
Application of GIS in hydrological and hydraulic modelling: DLIS and MIKE11-GIS <i>Henrik Refstrup Sørensen, Jesper T. Kjelds, Frank Deckers & Frank Waardenburg</i>	149
Distributed parameterization of a large scale water balance model for an Australian forested region <i>Fred G. R. Watson, Robert A. Vertessy & Lawrence E. Band</i>	157
4 Digital Terrain Models in GIS	
Digital landscape parameterization for hydrological applications <i>Jurgen Garbrecht & Lawrence W. Martz</i>	169
GIS procedure for automatic extraction of geomorphological attributes from TIN-DTM <i>Roberto Guercio & Fulvio Maria Soccodato</i>	175
Using DTMs and GIS to define input variables for hydrological and geomorphological analysis <i>Stefan W. Kienzie</i>	183
Effects of DEM data source and sampling pattern on topographical parameters and on a topography-based hydrological model <i>Philippe Lagacherie, Roger Moussa, Didier Cormary & Jerome Molena</i>	191
Spatial structures of digital terrain models and hydrological feature extraction <i>Jay Lee & Chien-Jen Chu</i>	201
Use of network algorithms in spatially distributed models for the study of river basin response <i>Marcello Niedda</i>	207
Automated parameter estimation for catchment scale river channel studies: the benefits of raster-vector integration <i>Gary Priestnall & Peter W. Downs</i>	215
TIN-based topographic modelling and runoff prediction using a basin geomorphic information system <i>Y. Tachikawa, T. Takasao & M. Shiiba</i>	225
5 Application of GIS in Water and Environmental Management	
Development of an integrated simulation and optimization system of river power plants and river reservoirs <i>T. Ackermann, L. Kons & J. Königster</i>	235

Evaluation of human exposure to contaminated water supplies using GIS and modelling <i>M. M. Aral & M. L. Maslia</i>	243
Using GIS and logistic regression to estimate agricultural chemical concentrations in rivers of the midwestern USA <i>William A. Battaglin & Donald A. Goolsby</i>	253
Applying GIS in characterizing and modelling contaminant transport in surface water at Los Alamos National Laboratory <i>Naomi M. Becker, Nancy A. David, John M. Irvine & Ed Van Eeckhout</i>	261
Redistribution of Chernobyl ¹³⁷ Cs in Ukraine wetlands by flooding and runoff <i>P. A. Burrough, M. Gillespie, B. Howard & B. Prister</i>	269
Professional integrity and the social role of hydro-GIS <i>Michael J. Clark</i>	279
Integrating GIS and time series analysis for water resources management in Portugal <i>João Ribeiro da Costa, H. B. Jesus & M. Lacerda</i>	289
Modelling floods and damage assessment using GIS <i>Tineke de Jonge, Matthijs Kok & Marten Hogeweg</i>	299
Use of a GIS in reconnaissance studies for small-scale hydropower development in a developing country: a case study from Tanzania <i>Younis A. Gismalla & Michael Bruen</i>	307
Coupling GIS and geohydrological models to assess point-source groundwater contamination risk – a planning tool for public water supply companies <i>Bernd Hofmann & Helmut Kobus</i>	313
Updating mean annual inflow to the Norwegian hydropower system by using GIS <i>Soeren Elkjaer Kristensen</i>	321
Using GIS for modelling radionuclide transport in complex river-reservoir networks <i>A. Marinets, D. Gofman & M. Zheleznyak</i>	325
A GIS model for the determination of wetland mitigation sites <i>M. Carson Mettel</i>	331
Addressing the non-point source implications of conjunctive water use with a geographic information system (GIS) <i>J. R. Nuckols, D. Ellington & H. Faidi</i>	341
Impact of land use on water resources: integrating HSPF and a raster-vector GIS <i>Carlos Tavares Ribeiro</i>	349
Land Ocean Interaction Study – a new approach to managing spatial and time series data for an interdisciplinary scientific research programme <i>C. Isabella Tindal</i>	357
GIS "Hydro-manager" and its application to water quality management in the Upper Ob River basin <i>Alexander Tskhai, Konstantin Koshelev & Michael Leites</i>	365
Assessing multiple waste sites using decision-support tools <i>Gene Whelan, John W. Buck, Karl Castleton & Alex Nazarali</i>	373

6 Application of GIS in Surface Water Systems

Scale definition in an integrated GIS hydrological model: a case study <i>C. Colosimo & G. Mendicino</i>	385
LISEM: a physically-based hydrological and soil erosion model incorporated in a GIS <i>Ad P. J. De Roo, Cees G. Wesseling, Victor G. Jetten & Coen J. Ritsema</i>	395
HAPEX-Sahel Hydrology GIS: towards regional water balance modelling in a semiarid area <i>J. C. Desconnets, B. E. Vieux & B. Cappelaere</i>	405
Application of GIS to derive Hydrological Response Units for hydrological modelling in the Bröl catchment, Germany <i>Wolfgang-Albert Flügel</i>	413
Spatially distributed snow modelling in mountainous regions: Boise River application <i>David C. Garen & Danny Marks</i>	421
Using GIS to predict concentrated flow erosion in cultivated catchments <i>Bruno Ludwig, Joel Daroussin, Dominique King & Veroniqueouchère</i>	429
Comparison of approaches for erosion modelling using flow accumulation with GIS <i>A. M. J. Meijerink, A. M. Van Lieshout & F. Rahnama Mobareke</i>	437
An assessment of the uncertainty of delimited catchment boundaries <i>D. R. Miller & J. G. Morrice</i>	445
A GIS-derived distributed unit hydrograph <i>I. Muzik</i>	453
Un modèle hydrologique spatialisé SIG, base de données et mécanismes hydrologiques <i>Michel Rissons & Claude Boacquillon</i>	461
Application of WEPP and GIS on small watersheds in USA and Austria <i>M. R. Savabi, A. Klık, K. Grulich, J. K. Mitchell & M. A. Nearing</i>	469
GIS-based components for rainfall-runoff models <i>Andreas H. Schumann & Roland Funke</i>	477
GIS-based regionalization in hydrology: German priority programme on spatial transfer of hydrological information <i>Ulrich Streit & Hans Kleeberg</i>	485
Watershed simulation and forecasting system with a GIS-oriented user interface <i>Bertel Vehviläinen & Jari Lohvansuu</i>	493
7 Application of GIS in Groundwater Systems	
Using remote sensing and GIS techniques to estimate discharge and recharge fluxes for the Death Valley regional groundwater flow system, USA <i>Frank A. D'Agnese, Claudia C. Faunt & A. Keith Turner</i>	503
Aquifer characterization using an integrated GIS-neural network approach <i>Ashim Das Gupta, Subhrendu Gangopadhyay, Tirrha Raj Gautam & Pushpa Raj Onta</i>	513
Estimating groundwater vulnerability to nonpoint source pollution from nitrates and pesticides on a regional scale <i>Bernard Engel, Kumar Navulur, Brian Cooper & Leighanne Hahn</i>	521

A geomatics platform for groundwater resources assessment and management in the Hadramout-Masila region of Yemen <i>Paul E. Hardisty, John Watson & Stephen D. Ross</i>	527
Using GIS for hierarchical refinement of MODFLOW models <i>Pierre T. W. J. Kamps & Theo N. Olthoorn</i>	535
GIS-embedded stochastic modelling of groundwater residence times for the supraregional analysis of hydrogeological problems <i>Ralf Kunkel & Frank Wendland</i>	543
Using GIS, MODFLOW and MODPATH for groundwater management of an alluvial aquifer of the River Sieg, Germany <i>Christian Michl</i>	551
Single-parameter sensitivity analysis for aquifer vulnerability assessment using DRASTIC and SINTACS <i>P. Napolitano & A. G. Fabbri</i>	559
Development of a GIS-based user shell for hydrogeological applications <i>Gunter Sokol</i>	567
MONA: an interface for GIS-based coupled saturated and unsaturated groundwater modelling in The Netherlands <i>J. A. P. H. Vermulst, J. Hoogeveen, W. J. De Lange, H. B. Bos & U. Pakes</i>	575
Use of 2D and 3D GIS in well selection and interpretation of nitrate data, central Nebraska, USA <i>I. M. Verstraeten, V. McGuire & W. A. Battaglin</i>	585
GeoFEST: an integrated GIS and visualization environment for the development of three-dimensional hydrogeological models <i>Mark D. Williams, Charles R. Cole, Michael G. Foley & Signe K. Wurster</i>	593
8 Remote Sensing and GIS	
Water resources modelling of the Worfe River catchment and Perak State using remote sensing and GIS <i>Md Azlin Md Saïd</i>	605
GIS and scientific visualization for hydrological simulation <i>Sally Kleinfeldt, Jonathan Deckmyn, Claudio Paniconi & Bart Cosyn</i>	613
A GIS for spatial and temporal monitoring of microwave remotely sensed soil moisture and estimation of soil properties <i>Nandish M. Mattikalli, Edwin T. Engman, Laj R. Ahuja & Thomas J. Jackson</i>	621
Evaluation of AVHRR-based land cover data as input for regional modelling of nutrient load to the Baltic Sea <i>Andrus Meiner</i>	629
Remote sensing and GIS from the perspective of hydrological systems and process dynamics <i>Gert A. Schultz</i>	637
Spatial evapotranspiration calculation on a microscale test site using the GIS-based PROMET-model <i>Stephan Schädlich & Wolfram Mauser</i>	649
GIS-aided land cover classification assessment based on remote sensing images with different spatial resolutions <i>Kaoru Takara & Toshiharu Kojima</i>	659

9 GIS in Relation to Decision Support and Expert Systems

- An object-oriented approach to model integration: a river basin information system example *K. Fedra & D. G. Jamieson* 669
- Achieving decision support with GIS: learning from water management applications in South Africa *Nicholas King* 677
- A hybrid expert system and neural network approach to environmental modelling: GIS applications in the RAISON system *David Lam & David Swayne* 685
- Development and use of map-based simulation shells for creating shared-vision models *Daniel P. Loucks, Peter N. French & Marshall R. Taylor* 695
- A GIS-supported Freshwater Information System including a pen-computer component for field data recording *Hardy Pundt, Ann Hitchcock, Matthias Bluhm & Ulrich A. Streit* 703
